22.4	Payment Initiation Service (PIS) Consent	82
22.5	Payment Initiation Service (PIS) Fulfilment	94
22.6	Card Based Payment Instrument Issuer (CBPII)	108
23. Dis	claimer	111

1. Introduction

HSBC has made all reasonable efforts to apply the OBIE standard to its Continental Europe Open Banking implementation. Therefore, developers should start with OBIE published documentation. <u>API Specifications - Open Banking Standards</u>

This Implementation Guide covers items HSBC wishes to provide further detail on. We welcome feedback to make this as useful as possible. Our implementation guide is designed to assist you, as a TPP with registration, on-boarding and completion of both AIS and PIS standard journeys.

If you'd like to provide any feedback please complete our Online Form.

You can access the HSBC CE well-known configurations via the following links:

Banking Area	Page Link
HSBC Corporate Continental Europe (HSBCnet CE)	https://eu.api.ob.hsbcnet.com/.well-known/openid-configuration

2. Key Changes and Announcements

Updated 28/09/2023

Key Changes:

- Update to payment status for Domestic Payments (section 13.5), Domestic Standing Orders (section 15.3), International Payments (section 16.6), and International Scheduled Payments (section 17.3).
- > File Payments are live section 19.
- Frrata Corrections section 11.6, section 16.1.1, section 18.5

Announcements:

3. Summary of HSBC API Functionality Per Channel

HSBC continues to make improvements and introduce new functionality to its Open Banking API channel. Below summarises the current per-brand position of live API functionality, and what can be expected to be live-to-market later in 2023

Brand	Product	Feature	Date (browser)	Date (app-2-app)
	Business	AIS	Live	Live
	Current	Confirmation of Funds	Live	Live
HSBC	Accounts	PIS (Domestic payments)	Live	Live
Corporate	Accounts	Complex Payments	Live	Live
Continental	Multi-Currency Accounts	AIS	Live	Live
Europe		Confirmation of Funds	Live	Live
(HSBCnet CE)		PIS (International Payments Only)	Live	Live
(1231110)	Credit Cards	AIS	Live	Live
	Credit Cards	Confirmation of Funds	Live	Live

4. Useful Information

4.1 Customer UI Journeys

For AISP journeys, our solution can determine whether the PSU is about to authorise a new consent or refresh an existing one. As a result, only the core information is displayed during the AISP refresh flow user journey.

PISP flows are enriched with similar features, to enable us to spot a payment request to a trusted beneficiary, or to apply SCA exemptions if applicable.

The above is supported by a responsive design which provides a smooth user experience on desktop and a mobile browser.

For further technical information please visit the Open Banking Security Profile - Implementer's Draft v1.1.2.

4.2 TPP Registration

For TPP registration HSBC supports version 3.2 of Dynamic Client Registration in line with specifications-

https://openbankinguk.github.io/dcr-docs-pub/v3.2/dynamic-client-registration.html.

Please note in version 3.2 of Dynamic Client Registration content-type should be application/jose.

Please note the audience (aud) value for the DCR request should be the 'issuer' value taken from each brands well-known configuration.

Please note the JWT expiry parameter (exp) in the request body should be set to a maximum of 30 mins.

4.2.1 Software Statement

TPPs need to check the address of HSBC's registration endpoint using our well-known endpoints:

Banking Area	Well-known Endpoint
HSBC Corporate Continental Europe (HSBCnet CE)	https://eu.api.ob.hsbcnet.com/.well-known/openid-configuration

TPPs need to register with their National Competent Authority (NCA) and to obtain an eIDAS certificate (QWAC and QSEAL) in order to register with HSBC's APIs for Continental Europe.

Software Statements:

A software statement can be issued by any actor that's trusted by its authorisation server.

TPPs using eIDAS certificates can generate a self-signed software statement (self-signed SSA) – see here for further information. A complete list of all fields required for a self-signed SSA is provided below in the tables:

Metadata	Metadata Description		Source Specification		
`software_id`	Unique Identifier for TPP Client Software	М	[RFC7591] ^[0-9a-zA-Z]{1,22}\$		

`iss`	`iss` SSA Issuer		[RFC7519] ^[0-9a-zA-Z]{1,22}\$ Identifier for the TPP. This value must be unique for each TPP registered by the issuer of the SSA For SSAs issued by the OB Directory, this must be the software_id
`iat`	Time SSA issued	М	[RFC7519]
`jti`	JWT ID	M	[RFC7519] ^[0-9A-F]{8}-[0-9A-F]{4}-4[0-9A-F]{3}- [89AB][0-9A-F]{3}-[0-9A-F]{12}\$` Max-36 length

Metadata	Description	Optional/ Mandatory (O or M)	Field Size	
`software_client_id`	The Client ID Registered at OB used to access OB resources	М	Base62 GUID (22 chars) HSBC Implementation support Max 36	
`software_client_descriptio n`	Human-readable detailed description of the client	0	Max256Text	
`software_client_name`	Human-readable Software Name	0	Max40Text	
`software_client_uri`	The website or resource root uri	0	Max256Text	
`software_version`	The version number of the software should a TPP choose to register and / or maintain it	0	decimal	
`software_environment`	Requested additional field to avoid certificate check	0	Max256Text	
`software_jwks_endpoint`	Contains all active signing and network certs for the software	M	Max256Text	
`software_jwks_revoked_e ndpoint`	Contains all revoked signing and network certs for the software	0	Max256Text	
`software_logo_uri`	Link to the TPP logo. Note, ASPSPs are not obliged to display images hosted by third parties	0	Max256Text	

`software_mode`	ASPSP Requested additional field to indicate that this software is `Test` or `Live` the default is `Live`. Impact and support for `Test` software is up to the ASPSP.	0	Max40Text
`software_on_behalf_of_or g`	A reference to fourth party organisation resource on the OB Directory if the registering TPP is acting on behalf of another.	0	Max40Text
`software_policy_uri`	A link to the software's policy page	0	Max256Text
`software_redirect_uris`	Registered client callback endpoints as registered with Open Banking	M	A string array of Max256Text items Pattern applied (?:\\[([0-9a-fA-F:]+)\\]](?:(?:[a-zA-Z0-9%~!\$&'()*+,;=]+(?::[a-zA-Z0-9%~!\$&'()*+,;=]*)?@)?([\\p{Alnum}\\-\\.]*)))(?::(\\d*))?(.*)?
`software_roles`	A multi value list of PSD2 roles that this software is authorized to perform.	M	A string array of Max256Text items
`software_tos_uri`	A link to the softwa'e's terms of service page	0	Max256Text
`organisation_competent_a uthority _claims`	Authorisations granted to the organsiation by an NCA		CodeList {`AISP`, `PISP`, `CBPII`, `ASPSP`}
`org_status`	Included to cater for voluntary withdrawal from OB scenarios		`Active`, `Revoked`, or `Withdrawn`
`org_id`	The Unique TPP or ASPSP ID held by OpenBanking.	M	HSBC Implementation support Max 18 char
`org_name` Legal Entity Identifier or other known organisation name		0	Max140Text
`org_contacts` JSON array of objects containing a triplet of name, email, and phone number		0	Each item Max256Text
`org_jwks_endpoint`	Contains all active signing and network certs for the organisation	0	Max256Text

`org_jwks_revoked_endpoint`	Contains all revoked signing and network certs for the organisation	0	Max256Text
`typ` MUST be set to `JWT`		M	
`alg`	MUST be set to `PS256`	М	
`kid`	The kid will be kept the same as the `x5t` parameter. (X.509 Certificate SHA-1 Thumbprint) of the signing certificate.	М	

Software statements are checked by the ASPSP on TPP registration / request for access.

Digital Signatures:

QSEALs or OBSEALS will also be required by TPPs to enable a digital signature feature. Use of a digital signature to sign payloads is mandatory.

4.2.2 Onward Provisioning – TPP / Agent name display options

Please note that TPPs must ensure that they have registered using the appropriate fields so that the correct information is displayed to customers.

Options	Display	Display Rule	Client Name	Org Name	'On Behalf Of' Name	What will display
When <org name=""> & <client name=""> are available & both are same & <software behalf="" name="" on=""> not available</software></client></org>	All (single name and key point)	Use <client name=""> as TPP name</client>	ABC Company Ltd	ABC Company Ltd	N/A	ABC Company Ltd
When <org name=""> & <client name=""> are available & both are different & <software behalf="" name="" on=""> not available</software></client></org>	All (single name and key point)	Use <client name=""> as TPP name</client>	ABC Trades	ABC Company Ltd	N/A	ABC Trades
When <org name=""> & <client name=""> are available & both are same & <software behalf="" name="" on=""> is available & is same as well</software></client></org>	All (single name and key point)	Use <client name=""> as TPP name</client>	ABC Company Ltd	ABC Company Ltd	ABC Company Ltd	ABC Company Ltd
When <org name=""> & <client name=""> are available & both are different & <software behalf="" name="" on=""> is available & is same as the <org name=""></org></software></client></org>	Both names to be displayed ¹	<agent> on behalf of <tpp> Use <softwareonbehalf> as Agent Use <client name=""> as TPP</client></softwareonbehalf></tpp></agent>	ABC Trades	ABC Company Ltd	ABC Company Ltd	ABC Company Ltd on behalf of ABC Trades
When <org name=""> & <client name=""> are available & both are different & <software behalf="" name="" on=""> is available & is same as the <client name=""></client></software></client></org>	All (single name and key point)	Use <client name=""> as TPP name</client>	ABC Trades	ABC Company Ltd	ABC Trades	ABC Trades
When <org name=""> & <client name=""> are available & both are same & <software behalf="" name="" on=""> is available & is different from both</software></client></org>	Both names to be displayed ¹	<agent> on behalf of <tpp> Use <softwareonbehalf> as Agent Use <client name=""> as TPP</client></softwareonbehalf></tpp></agent>	ABC Company Ltd	ABC Company Ltd	OBO Ltd	OBO Ltd on behalf of ABC Company Ltd
When <org name=""> & <client name=""> are available & both are different & <software behalf="" name="" on=""> is available & is different from both</software></client></org>	Both names to be displayed ¹	<agent> on behalf of <tpp> Use <softwareonbehalf> as Agent Use <client name=""> as TPP</client></softwareonbehalf></tpp></agent>	ABC Trades	ABC Company Ltd	OBO Ltd	OBO Ltd on behalf of ABC Trades

¹ Both names will always be displayed at the consent set-up step, however, for simplicity, single name may be displayed in some non-key steps within the journey.

4.2.3 Implemented Endpoints

Endpoints	Implemented
POST /register	Υ
GET /register/{ClientId}	Υ
PUT /register/{ClientId}	Υ
DELETE /register/{ClientId}	N

POST /register:

- > TPPs must include a complete ClientName and OrganisationName during the registration process.

 Both names should be:
 - Semantically and syntactically correct
 - Adhere to data integrity rules including correct capitalisation, consistent use of abbreviations and spacing
- If an agent is acting on behalf of the TPP, the agent name (Trading name of the Agent Company) must be provided within "software_on_behalf_of_org".

The audience 'aud' value should be:

Banking Area	Well-known Endpoint
HSBC Corporate Continental Europe (HSBCnet CE)	https://eu.api.ob.hsbcnet.com

GET /register:

This endpoint should be used only to request existing registration details for a client id. The request's Authorization header should have Bearer token as access_token retrieved from /token with client_credentials grant_type.

PUT /register:

- > TPPs may use this endpoint to update existing registration details. Relevant checks will be performed to ensure the updates are valid/allowed. An error message will be returned in instance of failures.
- The request should contain the response received from the GET /register as a jwt and the request's Authorization header should have Bearer token as access_token retrieved from /token with client_credentials grant_type.
- It is important to note that the entire GET /register payload is expected in PUT /register payload as well. Any value that does not need an update during registration is still expected to be sent in the request.

Also with respect to scope update, it is expected that all scope for which registration is required is sent. For example, even if TPP is registered with accounts scope, and expects payments to be updated as part of PUT /register, the value in the payload expected is accounts payments. This scope in PUT /register will be considered as a complete replace instead of append to the existing value.

The following fields can be updated via PUT/register:

Fields which can be updated using PUT/register				
exp	response_types			
grant_types	scope			
iat	software_id			
id_token_signed_response_alg	software_statement			
iss	request_object_signing_alg			
jti	token_endpoint_auth_method			
redirect_uris	token_endpoint_auth_signing_alg			

4.2.4 Supported token_endpoint_auth_method

Method	Supported
private_key_jwt	Υ
client_secret_jwt	N
client_secret_basic	N
client_secret_post	N
tls_client_auth	Υ

	Clarification on Scope parameter						
Endpoint	Journey	Scopes	Notes				
/register	PIS	"scope": "openid payments"	A Journey needs to be chosen based on				
	AIS	"scope": "openid accounts"	TPP specialization				
	CoF	"scope": "openid fundsconfirmations"					
	PIS, AIS, CoF	"scope": "openid payments accounts "fundsconfirmations"					
/token with "client_credentials" grant type	PIS	"scope": "payments"	OpenID should not be included in client credentials				
туре	AIS	"scope": "accounts"	Credentials				
	CoF	"scope": " fundsconfirmations "					
/authorize	PIS	"scope":"openid payments"	A Journey needs to				
	AIS	"scope":"openid accounts"	be chosen based on				
	CoF	"scope":"openid fundsconfirmations"	TPP specialization				

Please note that when calling the "token" endpoint with grant_type: "authorization_code" or "refresh_token" you must not send "scope" parameter. If you do, this will result in the error code "invalid_request"

Please note that the audience, "aud" value in JWT for the /token endpoint should be https://cbankinganeas/obie/open-banking/v1.1/oauth2/token.

For example: https://eu.api.ob.hsbcnet.com/obie/open-banking/v1.1/oauth2/token for HSBC Corporate.

4.2.5 MTLS when token_endpoint_auth_method is tls_client_auth

If MTLS tls_client_auth is used the tls_client_auth_subject_dn claim in the registration JWT must contain the full DN (Distinguished Name) of the transport (QWAC) certificate that the TPP will present to the ASPSP token endpoint to establish mutual TLS connection. The order of the attributes must also be the same as in the certificate subject value. Please note that this should not include the word 'Subject', but only the DN value inside the 'Subject' object field.

For example, a valid value would be:

CN=00158000016i44JAAQ,2.5.4.97=#131050534447422D4643412D373635313132,O=HSBC UK Bank Plc.C=GB

Expected format of tls_client_auth_subject_dn follows a string representation -- as defined in [RFC4514] -- of the DN. Please refer to https://tools.ietf.org/html/rfc4512#section-2 for formal definition of DN, RDN and attribute value assertion (AVA).

Currently supported short names for attribute types (descriptor - https://tools.ietf.org/html/rfc4514#section-2)

```
CN (2.5.4.3)
             C (2.5.4.6)
             L (2.5.4.7)
             S (2.5.4.8)
             ST (2.5.4.8)
             O (2.5.4.10)
             OU (2.5.4.11)
             T (2.5.4.12)
IP (1.3.6.1.4.1.42.2.11.2.1)
             STREET (2.5.4.9)
             DC (0.9.2342.19200300.100.1.25)
             DNQUALIFIER (2.5.4.46)
DNQ (2.5.4.46)
             SURNAME (2.5.4.4)
             GIVENNAME (2.5.4.42)
             INITIALS (2.5.4.43)
             GENERATION (2.5.4.44)
             EMAIL (1.2.840.113549.1.9.1)
             EMAILADDRESS (1.2.840.113549.1.9.1)
             UID (0.9.2342.19200300.100.1.1)
```

SERIALNUMBER (2.5.4.5)

Multiple keywords are available for one OID.

Attribute types not present on above list should be encoded as the dotted-decimal encoding, a "numericoid", of its OBJECT IDENTIFIER. The "numericoid" is defined in [RFC4512].

Example:

1.3.6.1.4.1.311.60.2.1.3=PL

Full Example:

CN=[value], ST=[value], 2.5.4.97=[value], 2.5.4.15=[value], 1.3.6.1.4.1.311.60.2.1.3=[value]

*[value] represents any value – it is a placeholder for real value.

4.3 Authentication Journey

Whenever a timeout occurs on the authentication UI, or the PSU closes a web/mobile browser the consent status will be saved in 'awaiting authorisation' status.

The consent status can be checked with dedicated endpoints.

In order to restart the authentication journey for the already created consent, instead of creating a new one, TPPs should call GET/authorize to start the authentication OAUTH journey again.

The value of the claim 'openbanking_intent_id' must be set to the consent for which the journey is being resumed.

4.4 Consent Expiry Date

Consent expiry is an optional field.

If consent expiry date is not populated, the consent will never expire (unless revoked by the TPP).

If consent expiry date is populated, its maximum value must be before 19/01/2038.

4.5 Authorisation Code in OAuth Authorisation Framework

The auth_authorisation code obtained after consent-confirmation completion is only valid for 60 seconds. Within this time-frame, the TPP must exchange the auth_authorisation code for an access token.

Please note the JWT expiry parameter (exp) in the request body should be set to a maximum of 30 mins.

Please see the summary table for token validities below:

Token	Endpoint	Time To Live
Auth Code	GET /authorize	1 minute
Access Token	POST/token grant type: client credentials	5 minutes

Token	Endpoint	Time To Live			
Access Token	POST/token	AIS - 60 minutes - OAuth Code elapsed time			
	grant type: authorization_code	PIS - 5 minutes - OAuth Code elapsed time			
	Please note you must not send "scope" for this scenario. If you do, this will result in the error code "invalid_request"				
Refresh token	POST/token	AIS			
	grant type: refresh_token	180 days – If consent expiry date is left blank or more than 180 days			
		Or			
		If consent expiry date is provided and less than 180 days the refresh token will only be valid up to the provided date			
		PIS			
		N/A there is no refresh token issued			
		CoF			
		equal to Consent Expiry Date			
		or			
		open ended if Consent Expiry Date not specified			

4.6 Message Signing

4.6.1 x-jws-signature

http://openbanking.org.uk/iss must match full DN of eIDAS certificate.

Please use the following command to obtain DN of the certificate:

openssl x509 -in eidas.pem -noout -subject -nameopt RFC2253

HSBC implemented message signing on 06 July 2020. As per the uplift to version v3.1.10 and in line with Waiver 007 requirements, HSBC has made changes to its accepted JWS validation for payment messages.

OBIE Field	Current HSBC Implementation
TPP b64 Header Claim	Must be omitted
TPP JWS Payload	Must be b64 encoded
HSBC b64 Header Claim (response to TPPs)	Will be omitted
HSBC b64 Payload (response to TPPs)	Will be b64 encoded

4.7 Consent Object Statuses

Statuses implemented are in line with the Read/Write Data API Specification – v3.1.10.

On top of what is articulated in the above link:

- PSU inactivity results in timeout and consent is kept in AWAITING AUTHORISATION status.
- Web/mobile browser window closure results in keeping the consent in AWAITING AUTHORISATION status. Intentional actions of the PSU on the HSBC authentication page result in moving the consent to REJECTED status.
- At any point in time a PSU can revoke a consent within HSBCs access dashboard. If this occurs, the consent will have a REVOKED status. If TPPs attempt to access any accounts using the original consent, a 403 FORBIDDEN error will be returned.

4.8 eIDAS Certificates

4.8.1 Test Certificates

In line with the electronic certificate (eIDAS) regulation, production APIs require a QTSP issued QWAC certificate to securely connect.

For the purposes of the testing facility we provide TPPs with the required certificates to develop and test your application against our Sandbox.

To generate a test certificate, please execute the following commands using OpenSSL:

1. Generate a new RSA private key:

\$ openssl genrsa -out server.key 2048

2. Generate the X.509 Certificate Signing Request:

\$ openssl req -sha256 -new -key server.key -out server.csr -outform der

4.8.2 Certificate Requirements

Requirements for the TLS and HTTP Signature certificate:

Public key algorithm: RSA-2048 bits.

Signature algorithm: SHA-256 bits.

Valid upon upload.

4.8.3 Certificate Refresh / Replacement

eIDAS Certificate Expiration and Refresh

TPPs can update expiring eIDAS certificates without impacting lasting consents by using their new eIDAS certificates with their existing registrations, as long as the following conditions are met:

- The new certificate should have same full subject DN as the previous certificate.
- Access tokens are bound to the certificate, so previous access tokens will not work with new certificate. Thus, before using the new certificate you need to request a new access token with corresponding new refresh tokens bound to the new certificates.
- > There are no steps required for fulfilment on the HSBC side prior to use of the new certificate.

elDAS Certificate Rotation (prior to expiration)

It is possible for TPP's to rotate existing eIDAS certificates with new certificates without causing need for customers to refresh consents or experiencing any downtime / breakage in channel connectivity. However, the following conditions must be met:

- > The new certificate should have same full subject DN as the previous certificate.
- All access tokens bound to old certificate must be discarded and new access tokens requested corresponding new refresh tokens and new certificates.
- > There are no steps required for fulfilment on the HSBC side prior to use of the new certificate.

4.9 HSBCnet UK IP Address Whitelisting and grating user access

Customers who have enabled IP address whitelisting in HSBCnet UK may face 'Access Denied' error during the consent or fulfilment journeys as the IP address in the API request call may not be in the IP - whitelist setup by the customer. If 'Access Denied' error persists, the IP Whitelist can be updated or removed by the Customer by sending an email by Customer RM or Admin to Local Help Desk as per the current process.

Before customers can use Open Banking, their HSBCnet UK system administrator must grant them the relevant permission through the HSBCnet UK browser channel.

Accounts and Transactions v3.1.10

5. Accounts and Transactions Summary v3.1.10

As per OBIE customer research, to ensure consistency of language across AISPs and ASPSs, HSBC is now adhering to the OBIE guidelines and referring to all 'groups of permissions' as 'Data Clusters'. Please refer to <a href="https://view.officeapps.live.com/op/view.aspx?src=https%3A%2F%2Fstandards.openbanking.org.uk%2Fwp-content%2Fuploads%2F2022%2F04%2FCustomer-Experience-Guidelines-Checklist-Version-v3110-Final.xlsx&wdOrigin=BROWSELINK for further information.

Following the consent creation, if a TPP tries to trigger any of the fulfilment endpoints for a consented account where the account has now transitioned to an inactive state will result in an error – "Failed Eligibility Check". The scenarios where an account could transition to an Inactive state are – Account closed, Customer not registered for Internet banking.

Note: There is a daily batch update window during which TPPs may encounter a "Papi call exception" error, the batch update process usually takes 15 minutes. HSBCnet CE batch start time – 19:00 UKT, batch end time – 03:30 UKT. If TPPs encounter this error during the batch window, they should try again in 30 minutes.

5.1 Implemented Endpoints

The following account and transaction endpoints are implemented:

5.1.1 HSBC Corporate Continental Europe (HSBCnet CE) Endpoints

Resource	Endpoints	Mandatory	Business Current Account	Foreign Currency Account	Credit Cards (Malta only)	Savings Account	Deposit Accounts
Access consent	/account-access-consents (POST/ GET/ DELETE)	Mandatory	Υ	Υ	Υ	Υ	N
Accounts	GET /accounts	Mandatory	Υ	Υ	Υ	Υ	N
Accounts	GET /accounts/{AccountId}	Mandatory	Y	Υ	Υ	Y	N
Balances	GET /accounts/{AccountId}/balances	Mandatory	Υ	Υ	Υ	Υ	N
Transactions	GET /accounts/{AccountId}/transactions	Mandatory	Y	Υ	Υ	Υ	N
Standing- orders	GET /accounts/{AccountId}/standing-orders	Conditional	Υ	N	N	N	N
Scheduled- payments	GET /accounts/{AccountId}/scheduled-payments	Conditional	Υ	N	N	N	N
Beneficiaries	GET/accounts/{AccountId}/beneficiaries	Conditional	Υ	N	N	N	N

5.2 In-scope Products

5.2.1 HSBC Corporate Continental Europe (HSBCnet CE)

Products:

- Current Accounts (EU markets) *
- Credit Cards (Malta only)
- Foreign Currency Accounts
- Global Wallet Accounts

* TPPs authorised in the UK will only have access to HSBCnet CE accounts domiciled in the UK. TPPs authorised in an EU country will have access to HSBCnet CE accounts domiciled in all EU countries. TPPs authorised in an EU country and included in FCA TPR will have access to HSBCnet CE accounts domiciled in the UK and all EU countries.

6. Account Request API v3.1.10

6.1 Overview

The following values that are not in strikethrough are accepted in OBReadRequest1/Data/Permissions:

- ReadAccountsBasic
- ReadAccountsDetail
- ReadBalances
- ReadBeneficiariesBasic
- ReadBeneficiariesDetail
- ReadDirectDebits
- ReadOffers
- ReadPAN
- ReadParty
- → ReadPartyPSU
- ReadProducts
- ReadScheduledPaymentsBasic
- ReadScheduledPaymentsDetail
- ReadStandingOrdersBasic
- ReadStandingOrdersDetail
- ReadStatementsBasic
- ReadStatementsDetail
- ReadTransactionsBasic
- ReadTransactionsCredits
- ReadTransactionsDebits
- ReadTransactionsDetail

6.2 Implemented Endpoints

6.2.1 HSBC Corporate Continental Europe (HSBCnet CE) Endpoints

Resource	Endpoints	Mandatory	Business Current Account	Foreign Currency Account	Credit Cards (Malta only)	Savings Account	Deposit Accounts
Accounts	GET /accounts	Mandatory	Υ	Υ	Υ	Υ	N
Accounts	GET /accounts/{AccountId}	Mandatory	Υ	Υ	Υ	Υ	N

6.3 Key Information about Account Identification

Product Type	Field	Notes
Credit Cards	Data/Account/Account /Identification	format: AccountCountryCode+AccountInstitution+AccountType+Un-masked control card account number. For commercial cards, the Identification will contain the control commercial card account number, and not the individual commercial card number. As such, the Identification will always contain the unmasked number, even if the ReadPan attribute has not been specifically provided
Global Wallet	Data/Account/Account /SchemeName	HSBCnet CE use BBAN for Global Wallet accounts
Global Wallet	Data/Account/Account /Identification	HSBCnet CE – Global Wallet identification is 19 alphanumeric characters "WAXXXXXXXXXXXXYYY"
		WA denotes a Global Wallet account, followed by 14-digit account number and 3 letter currency code (e.g. USD, EUR, AUD etc.)
Global Wallet	Date/Account/Account SubType	HSBCnet CE – Global Wallet AccountSubType will be CurrentAccount

6.4 Credit Card Product Behaviour (replacement cards)

HSBCnet CE:

Existing AIS consents relating to old card/ (s) details are retained upon issuance of a new card/(s). There is no requirement to re-authorize existing related consents to old card/ (s).

7. Balances API v3.1.10

7.1 Implemented Endpoints

7.1.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

Resource	Endpoints	Mandatory	Business Current Account	Foreign Currency Account	Credit Cards (Malta only)	Savings Account	Deposit Accounts
Balances	GET /accounts/{AccountId}/balances	Mandatory	Υ	Υ	Υ	Υ	N

7.1.2 HSBC Corporate Continental Europe (HSBCnet CE)

	Balance API Returns - Current Accounts							
Field	Definition	Notes						
Closing Ledger Balance	Closing time ledger balance	Populates the closing balance [CLBD] as PreviouslyClosedBooked*						
Closing Available Balance	EOD ledger balance	Populates available closing balance [CLAV] as ClosingAvailable*						
Current Ledger Balance	Real time ledger balance	Populates the current balance [ITBD] as InterimBooked*						
Current available	Real time available balance	Populates the available balance [ITAV] as InterimAvailable*						
Opening available balance	Opening available balance	Populates opening available balance [OPAV] as OpeningAvailable*						
Opening Ledger Balance	Opening ledger balance	Populates opening balance [OPBD] as OpeningBooked*						

^{*} Only if balance amount is available, otherwise not returned.

Balance API Returns - Credit Cards						
Field	Definition	Notes				
Current Ledger Balance	Real time ledger balance	Populates the current balance as InterimBooked*				
Current available	Real time available balance	Will include the available credit as InterimAvailable*				

^{*} Only if balance amount is available, otherwise not returned.

8. Transaction API v3.1.10

8.1 Overview

Both domestic and international transactions will be included in the response.

8.1.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

Resource	Endpoints	Mandatory	Business Current Account	Foreign Currency Account	Credit Cards (Malta only)	Savings Account	Deposit Accounts
Transactions	GET /accounts/{AccountId}/transactions	Mandatory	Υ	Υ	Υ	Υ	N

8.2 Transaction History

The table below outlines the transaction history and pagination limitations for each HSBC brand by product type:

HSBC brand	Product type	Max. number of transactions returned per page	Transaction status	Period supported
HSBC Corporate Continental Europe (HSBCnet CE)	Current Accounts	400	Pending & Booked	7 years
HSBC Corporate Continental Europe (HSBCnet CE)	Credit Cards	300	Unbilled & Billed	7 years

8.3 Lifespan of Next Links

When the transaction endpoint has been called for a date range greater than 90 days in the past, the 'next' link it returns has a lifespan of 5 minutes from SCA.

If the 'next' link is used within these 5 minutes, the 'next' link returned by that call will have a lifespan extended by 5 minutes, and so forth. This is to permit traversal or large transaction data sets.

The access token must continue to be refreshed.

Anything other than Accounts, Balances and Transactions are restricted endpoints and so will be disabled once the 60 minutes since SCA has expired, or when the next access token is received from the refresh token.

8.4 Truncation

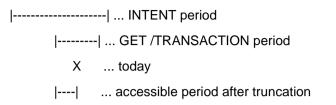

The date ranges of the transactions returned by the GET /accounts/{AccountId}/transactions message depend upon two date ranges, indicating the intent and requested time periods. The behaviour of the API can change depending on how these are populated (or not) and how they overlap. This is documented in detail below:

When the TPP sends in its POST /account-requests, it can send in transactionFromDate and transactionToDate:

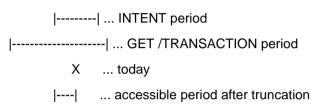

- > These are the time-limits of the period of transactions that the PSU has consented to the TPP seeing.
- These can be for any duration.
- If the request doesn't have these fields, HSBC defaults to transactionFromDate = 2190 days prior (i.e. 6 years) and transactionToDate = today, on a rolling basis, e.g. if the GET /accounts/{AccountId}/transactions is sent a week after the POST /account-requests, it will have access to the most recent 7 days, but no longer have access to the 7 days at the start of the 2190-day period from the date the POST /account-requests was sent in.
- ➤ When the TPP sends in GET /accounts/{AccountId}/transactions, it can send in *fromBookingDateTime* and *toBookingDateTime*:
- ➤ HSBC will accept a future-dated toBookingDateTime, but this will have the same net result as setting the date to today (see later section Booked and Pending Transactions) termed 'future truncation'.
- If no dates are provided, HSBC will return the most recent transactions working backwards from the intent's *transactionToDate*..**Please also refer to** *Section* **for pagination behaviour in this scenario.**
- If the dates provided go beyond the maximum number of days for which transactions are available (e.g. 6 years), HSBC will return the maximum available (6 years in this example).
- ► HSBC will truncate dates that don't crossover with the intent's *transactionFromDate* and *transactionToDate* termed 'crossover truncation'.

To identify that future truncation or crossover truncation has occurred, the TPP may wish to check the 'self' link returned, which will contain proprietary fromBookingDateTime and toBookingDateTime fields. It's not possible to identify the reason.

Example 1: crossover truncation and future truncation I

Example 2: crossover truncation and future truncation II

Example 3: crossover truncation, but future truncation is irrelevant

```
|-----| ... INTENT period
|-----| ... GET /TRANSACTION period

X ... today is irrelevant, so no future truncation occurs
|--| ... accessible period after truncation
```

Example 4: crossover truncation where there is no crossover

8.5 Transaction Ordering

HSBC returns the transactions in reverse date order (i.e. most recent first).

8.6 Pagination

Pending transactions (both domestic and international) are sent in the first response to the TPP followed by booked transactions.

Page size is variable according to circumstances, for example the maximum number of days' data that can be returned in a single page will vary according to the product type being queried, and the final page of a set will almost always be smaller due to having fewer remaining transactions.

TPPs should not rely upon any specific logic with regards to pagination nor should they rely upon the size of the returned page to determine whether there is another, but only use the next link, if returned.

Please note that if no dates are provided in the "query" parameter, the first page returned will only include pending transactions (if any exist). If no pending transactions exist, this page will be blank. TPPs must, as always, click on the 'next' link, if returned to obtain the booked transactions.

For all product types and all HSBC brands, we will return all transactions (most recent to oldest) within a 180-day block. Where the TPP request is > 180 days, the next link must be used to retrieve the remaining transactions.

8.7 Date Filtering

HSBC accepts one, both or neither of the *fromBookingDateTime* and *toBookingDateTime* parameters being passed.

8.8 Time Filtering

HSBC does not utilise times in transaction date-times, so the time components of *fromBookingDateTime* and *toBookingDateTime* are ignored, and data will be returned from the fromBookingDateTime 00:00:00 until the toBookingDateTime 23:59:59 (subject to pagination).

8.9 Booked and Pending Transactions

- GET /accounts/{AccountId}/transactions can return both booked and pending transactions depending on product type.
- Pending transactions can have a date of today or later; booked transactions can have a date of today or earlier.
- If GET /accounts/{AccountId}/transactions toBookingDateTime is set to today it will include all pending transactions.
- Assuming they are both within the requested date range, pending transactions are returned before booked transactions.
- When paginating the response, a page may contain both pending and booked transactions.

8.10 Response Fields

8.10.1 HSBC Response Fields

Field	Notes
/Data/Transaction/BankTransactionCode/code	Not returned
/Data/Transaction/ProprietaryBankTransactionCod e/code	Populated with the following values for PCA and Savings Account:
))) - Contactless debit card payment ATM - Cash machine BP - Bill payment CHQ - Cheque

Field	Notes
	CR - Credit DD - Direct Debit or other BACS debit DIV - Dividend DR - Debit OBP - Open Banking Payment OBT - Open Banking Transfer (me to me) PYM - Paym SO - Standing order TFR - Transfer VIS - Visa Populated with the following values for Credit Cards: MAIL_ORDER_OR_TELEPHONE_ORDER_PURCH ONLINE_PURCHASE CONTACTLESS_PURCHASE OTHER_PURCHASE ATM_CASH_WITHDRAWAL OTHER_CASH_WITHDRAWAL PAYMENT FEES INTEREST RETURNS_OR_REFUNDS OTHER_TRANSACTIONS
Data/Transportion/TransportionId	* This field is not applicable for HSBCnet CE
Data/Transaction/TransactionId	Unique identifier for the transaction Note: For credit card transactions, which incur a fee (for example ATM withdrawal, foreign currency transaction), the transaction and the corresponding fee will have the same transaction ID
	* HSBCnet CE - For booked transactions only, HSBCnet returns a unique transaction ID.
Data/Transaction/TransactionReference	Acquirer Reference Number (for Credit Cards)

8.11 Mutability Flag

A mutability flag will be returned on applicable transactions as part of the response. Mutable transactions are for noting and could change as part of some of our backend processing, whilst immutable transactions will not ordinarily be subject to any further processing.

There is an edge case scenario, where a transaction is made and then reversed within the same day. In this scenario, both the original transaction and the reversed transactions will disappear from the list of transactions. This is in line with the behavior in our direct online channels. We therefore suggest that TPPs only take the 'immutable' flag as true until 24 hours after the transaction date, to avoid such edge case scenarios.

8.12 Restricted Data for Lasting Consents (also known as Article 10a access)

- > TPPs can access all the data clusters included in the customer consent within 60 minutes of SCA.
- For subsequent requests, TPPs can only access Balance and the last 90 days of transaction history without SCA (customer not present). More specifically:

The following endpoints are available outside of Article 10a access (i.e. without re-SCA).

- GET /accounts
- GET /accounts/{AccountId}
- GET /accounts/{AccountId}/balances
- ➢ GET /accounts/{AccountId}/transactions

These are examples of the Restricted endpoints which are available within the 60 minutes of SCA

- GET /accounts/{AccountId}/direct-debits
- GET /accounts/{AccountId}/standing-orders
- GET /accounts/{AccountId}/beneficiaries

Following the first 60 minutes after SCA these are only available if the customer re-SCAs and for another 60 minutes.

- For requests outside the Article 10a exemption, we return only the data clusters allowed (Balance and Transactions under 90 days) and return 403 errors for other data clusters, which may be included in the same request (e.g. standing orders).
- For the Transactions data cluster, more specifically, the data requested must be for up to 90 days in order to return a successful response. If a request includes transactions that are older than 90 days, then a 403 will be returned for the entire cluster; partial responses are not returned. The TPP can then trigger a re-SCA flow if they wish to access data outside the Article 10a exemption.
- For more information please refer to –
 https://openbanking.atlassian.net/wiki/spaces/DZ/pages/1009778990/How+the+OBIE+Standard+can+be+used+in+relation+to+RTS+Article+10

9. Standing Orders API v3.1.10

9.1.1 HSBC Corporate Continental Europe (HSBCnet CE) Endpoints

Resource	Endpoints	Mandatory	Business Current Account	Foreign Currency Account	Credit Cards (Malta only)	Savings Account	Deposit Accounts
Standing- orders	GET /accounts/{AccountId}/standing-orders	Conditional	Υ	N	N	N	N

9.2 Permissions

The **ReadParty** permission is required to access GET /accounts/{AccountId}/party or GET /accounts/{AccountId}/parties. The resource response payload does not differ depending on the permissions granted.

The **ReadPartyPSU** permission is required to access GET /party. However, the **ReadPartyPSU** permission would not be supported, since the bulk GET /party endpoint isn't being supported.

10. Scheduled Payments API v3.1.10

10.1 Implemented Endpoints

10.2 HSBC Corporate Continental Europe (HSBCnet CE) Endpoints

Resource	Endpoints	Mandatory	Business Current Account	Foreign Currency Account	Credit Cards (Malta only)	Savings Account	Deposit Accounts
Scheduled- payments	GET /accounts/{AccountId}/scheduled-payments	Conditional	Υ	N	N	N	N

11. Beneficiaries API v3.1.10

11.1 Overview

The beneficiaries resource is used by an AISP to retrieve the list of beneficiaries for a specific Accountld that the PSU has authorized to access. The bulk beneficiaries endpoint is not supported for HSBCnet.

11.2 Implemented endpoints

Resource	Endpoints	Mandatory	Business Current Account	Foreign Currency Account	Credit Cards (Malta only)	Savings Account	Deposit Accounts
Beneficiaries	GET/accounts/{AccountId}/beneficiaries	Conditional	Υ	N	N	N	N

11.3 Beneficiary list

The table below outlines the beneficiary list and pagination limitations for each HSBC brand by product type:

HSBC brand	Product type	Max. number of beneficiaries returned per page	Beneficiary status	Period supported
HSBCnet CE	Business Current Accounts	50	Approved	7 years

11.4 Beneficiaries ordering

HSBCnet CE returns the beneficiary details in reverse date order (i.e., beneficiary details added in the template that is created most recent returns first to TPP).

11.5 Pagination

HSBCnet CE returns max 50 beneficiaries/page. For cases where the number of beneficiaries received for, a particular debit account exceeds 50, then pagination is supported, and additional records can be viewed using next and previous navigations.

11.6 Payment types supported to retrieve beneficiaries

HSBCnet CE retrieves the beneficiaries from templates which are created for below payment type:

- Priority Payment (PP)
- Inter Account Transfer (IAT)
- SEPA
- ACH Credit
- ACH Debit

11.7 Beneficiary details returned in response

HSBCnet CE returns the below fields to TPP for the received debit account if the debit account has all the necessary entitlements to receive the specific beneficiary information.

Field	Notes
/Data/Beneficiary/CreditorAccount/Identification	Mandatory field This field includes the Creditor account number for the approved beneficiaries.
/Data/Beneficiary/CreditorAccount/Name	Optional field This field contains the beneficiary's name for the approved beneficiary.
/Data/Beneficiary/CreditorAccount/SchemeName	Mandatory field This field contains the beneficiary account number type Possible values: 1. "UK.OBIE.SortCodeAccountNumber" 2. "UK.OBIE.IBAN" 3. "UK.OBIE.BBAN" Out of scope 4. UK.OBIE.PAN 5. UK.OBIE.Paym

Payment Initiation Summary v3.1.10

12. Payment Initiation Summary v3.1.10

12.1 Faster Payments

Please note there is a risk that payment requests received between 18:00 - 23:45 which are deemed to require additional fraud checks have the potential to be rejected/declined, unless the fraud checks can be completed with the customer on the same day.

12.2 Implemented Endpoints

12.2.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

The following payment endpoints are implemented for HSBC Corporate CE.

Please note that domestic endpoints are to be used for domestic payments in Local currency only.

POST /domestic-payment-consents	Resource	Endpoints	Business Current Account	Foreign Currency Account	Deposit Account	Global Wallet
payment-consents GET //domestic-payments		POST /domestic-payment-consents	Υ	N	N	N

Υ

12.3 Payments refunds

International-

standing-orders

For TPPs to receive payment refund details in both domestic and international payment responses, the field "readRefundAccount" must be true and the payment initiation must be successful.

However, if the payment initiation fails, or is not complete (as per the below statues) payment refund details will not be shared even if the readRefundAccount is true.

• HSBCnet CE - pending, rejected, initiationPending and initiationFailed

13. Domestic Payments v3.1.10

13.1 Implemented Endpoints

13.1.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

The following payment endpoints are implemented:

Resource	Endpoints	Business Current Account	Foreign Currency Account	Deposit Account	Global Wallet
	POST /domestic-payment-consents	Υ	N	N	N
Domestic-	GET /domestic-payment-consents/{ConsentId}	Υ	N	N	N
payment-consents	GET /domestic -payment-consents/{ConsentId}/funds-confirmation	Υ	N	N	N
Domestic- payments	POST /domestic-payments	Υ	N	N	N
	GET /domestic-payments/{DomesticPaymentId}	Υ	N	N	N

13.2 Request Fields

For POST /domestic-payment-consents and POST /domestic-payments:

13.2.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

Field	Notes				
LocalInstrument (O)	May be optionally provided as per any of the below supported enumeration values in case sensitive format only:				
	UK.OBIE.SWIFT (for non-UK payments) UK.OBIE.Target2 (for all PSD2 payments) UK.OBIE.Euro1 (for all PSD2 payments) Note: UK.OBIE.BalanceTransfer, UK.OBIE.MoneyTransfer, UK.OBIE.Paym & UK.OBIE.Link is not supported currently. UK.OBIE.SEPACreditTransfer,UK.OBIE.SEPAInstantCreditTransfer is not supported via Domestic endpoint payment initiation				
DebtorAccount/SchemeName (O)	May be optionally provided as per any of the below supported enumeration values only : UK.OBIE.IBAN UK.OBIE.BBAN UK.OBIE.SortCodeAccountNumber				
DebtorAccount/Identification (O)	May be optionally provided as a valid IBAN, BBAN, SortCodeAccountNumber having character length less than or equal to 35				

Field	Notes				
CreditorAccount/Name (M)	Must be provided				
CreditorAccount/SchemeName (M)	Must be provided as per any of the below supported enumeration values only: UK.OBIE.IBAN UK.OBIE.BBAN				
	If you wish to pay Faster Payment (ACH Credits)/ BACS Direct Credits (ACH Credits)/ Faster Payment (Priority Payment) from a "Great Britain" account, then CreditorAccount/SchemeName must be UK.OBIE.SortCodeAccountNumber				
CreditorAccount/Identification (M)	Must be provided in SWIFT character set having character length less than or equal to 34,				
	(1) Debtor and Creditor account locations should be the same and should be amongst the UK and EU countries.				
	(2) If the CreditorAccount/SchemeName is mentioned as UK. OBIE.SortCodeAccountNumber, then this CreditorAccount/Identification must be of numeric and of length 14 (comprising first 6 digits as Sort Code, and last 8 digits as Account number)				
	(3) If you wish to pay Priority Payment to a "Czech Republic" account, then CreditorAccount/Identification must be a valid Czech Republic IBAN or BBAN				
	(4) If you wish to pay Priority Payment to a "Poland" account, then this CreditorAccount/Identification must be a valid Poland IBAN or BBAN				
CreditorPostalAddress/AddressLine (O)	(1) If creditorPostalAddress is provided, it must be in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2].				
	(2) If you wish to pay using "Inter-Account Transfer", then this field must not be filled.				
	(3) If you wish to pay Faster Payment (ACH Credits)/ BACS Direct Credits (ACH Credits) from a "Great Britain" account, then CreditorPostalAddress/AddressLine must not be provided				
InstructedAmount (M)	Amount: Must not be more than 19 characters including maximum 3 decimal places. Also, it must not be less than 0.01				
	Currency: Must be equal to debit account currency				
RemittanceInformation/Reference (0)	May be optionally provided				
RemittanceInformation/Unstructured (0)	May be optionally provided				
ReadRefundAccount (O)	May be optionally provided (Possible values Yes/No).

13.3 Fees for CHAPS Payments

- The PSU can select a different account for bearing the charges for the CHAPS transaction.
- 2. The charge will be a dynamic amount for each CHAPS transaction request.

13.4 Cut-Off Time for CHAPS Payments

Cut-off time for CHAPS payment is 8:00 AM to 5:10 PM UK time. Any request for a CHAPS payment outside these values will be rejected. These cut-off times are aligned to the offering on the direct channels.

13.5 Payment Status

For Single Immediate Domestic payments, a request for a payment status HSBC returns one of the following payment statuses:

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position
POST /domestic- payments	"Accepted Credit Settlement Completed"	200	Final	Not available	Not returned via POST
	"Accepted Settlement Completed"	200	Interim	Not available	Not returned via POST

"Accepted Settlement In Process"	200	Interim	HSBCnet	All preceding checks such as technical validation and customer profile were successful therefore the payment initiation has been accepted for execution. Debit and credit have not been posted. This will be further updated to: 'Accepted Credit Settlement Completed' or 'Rejected' based on a pay/no-pay decision. The terminal status can be accessed via the Get/DomesticPayment/Domestic PaymentId endpoint.
"Rejected"	200	Final	HSBCnet	Payment request is rejected (no Debit and no Credit posted to the account).

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position	
GET /domestic- payments/ {DomesticPaymentId}	"Accepted Settlement In Process"	200	Interim	HSBCnet	All preceding checks such as technical validation and customer profile were successful therefore the payment initiation has been accepted for execution. Debit and credit have not been posted. This will be further updated to: 'Accepted Credit Settlement Completed' or 'Rejected' based on a pay/no-pay decision.	
	"Accepted Credit Settlement Completed"	200	Final	HSBCnet	Payment request has been processed successfully (i.e. Debit and Credit have bee posted successfully). Current balance reflects position after the De / Credit has taken place.	
	"Rejected"	200	Final	HSBCnet	Payment request is rejected (no Debit and no Credit posted to the account).	
	"Pending"	200	Interim	HSBCnet	Payment request is pending for review or authorization.	
	"Cancelled"	200	Final	HSBCnet	Payment request is rejected (no Debit and no Credit posted to the account).	
	"Awaiting further authorization"	200	Final	HSBCnet	Payment request is pending for authorization.	

Note: TPPs can request & receive payment status updates for up to 10 days after the payment has been posted. A final payment status can be returned by 'GET' endpoint.

In a scenario where a TPP terminates the connection before they have received a response from the POST endpoint, the payment may still have been submitted for processing. I this scenario, the TPP should resubmit the payment with the same idempotency key (x-idempotency-key) so that they can check the payment status. This will not result in a duplicate payment if using the same idempotency key.

14. Domestic Scheduled Payment v3.1.10

14.1 Implemented Endpoints

14.1.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

The following payment endpoints are implemented:

Resource	Endpoints	Business Current Account	Foreign Currency Account	Deposit Account	Global Wallet
Domestic- POST /domestic-scheduled-payment-consents		Υ	N	N	N
scheduled- payment-consents	GET /domestic-scheduled-payment-consents/{ConsentId}	Υ	N	N	N
Domestic-	POST /domestic-scheduled-payments	Y	N	N	N
scheduled- payments	GET /domestic-scheduled-payments/{DomesticScheduledPaymentId}	Υ	N	N	N

Note: Working capital debit accounts are NOT supported via Domestic-scheduled-payment-consents endpoint

14.2 Request Fields

For POST /domestic-scheduled-payment-consents and POST /domestic-scheduled-payments:

14.2.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

Field	Notes
LocalInstrument (O)	May be optionally provided as per any of the below supported enumeration values in case sensitive format only :
	 UK.OBIE.SWIFT (for non-UK payments)
	 UK.OBIE.Target2 (for all PSD2 payments)
	 UK.OBIE.Euro1 (for all PSD2 payments)
	Note: UK.OBIE.BalanceTransfer, UK.OBIE.MoneyTransfer, UK.OBIE.Paym,
	UK.OBIE.Link is not supported currently.
	UK.OBIE.SEPACreditTransfer,UK.OBIE.SEPAInstantCreditTransfer is not
	supported via Domestic endpoint payment initiation
RequestedExecutionDateTime (M)	Must be within next 45 calendar days
DebtorAccount/SchemeName (O)	May be optionally provided as per any of the below supported enumeration values only :
	UK.OBIE.IBAN
	UK.OBIE.BBAN
	 UK.OBIE.SortCodeAccountNumber
DebtorAccount/Identification (O)	May be optionally provided as a valid IBAN, BBAN, SortCodeAccountNumber having character length less than or equal to 35
CreditorAccount/Name (M)	Must be provided
CreditorAccount/SchemeName (M)	Must be provided as per any of the below supported enumeration values only
	UK.OBIE.IBAN
	UK.OBIE.BBAN
	If you wish to pay BACS Direct Credits (ACH Credits) from a "Great Britain"
	account, then CreditorAccount/SchemeName must be
	UK.OBIE.SortCodeAccountNumber

Field	Notes
CreditorAccount/Identification (M)	Must be provided in SWIFT character set having character length less than or equal to 34,
	(1) Debtor and Creditor account locations should be the same and should be amongst the UK and EU countries.
	(2) If the CreditorAccount/SchemeName is mentioned as UK.OBIE.SortCodeAccountNumber , then this CreditorAccount/Identification must be of numeric and of length 14 (comprising first 6 digits as Sort Code, and last 8 digits as Account number)
	(3) If you wish to pay Priority Payment to a "Czech Republic" account, then CreditorAccount/Identification must be a valid Czech Republic IBAN or BBAN
	(4) If you wish to pay Priority Payment to a "Poland" account, then this CreditorAccount/Identification must be a valid Poland IBAN or BBAN
CreditorPostalAddress/AddressLine (O)	(1) If creditorPostalAddress is provided, it must be in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2].
	(2) If you wish to pay using "Inter-Account Transfer", then this field must not be filled.
	(3) If you wish to pay BACS Direct Credits (ACH Credits) from a "Great Britain" account, then CreditorPostalAddress/AddressLine must not be provided
InstructedAmount (M)	Amount : Must not be more than 19 characters including maximum 3 decimal places. Also, it must not be less than 0.01
	Currency: Must be equal to debit account currency
RemittanceInformation/Reference (O)	Must not be provided.
RemittanceInformation/Unstructured (O)	May be optionally provided
ReadRefundAccount (O)	May be optionally provided (Possible values Yes/No).
Authorisation.AuthorisationType	Must not be provided
Authorisation.CompletionDateTime	
channelPaymentId	
Creditor.PostalAddress.AddressLine[3 and onwards] (Priority Payment)	
CreditorAccount.SecondaryIdentification	
DebtorAccount.SecondaryIdentification	
Risk.DeliveryAddres.AddressLine[0 -2]	
Risk.DeliveryAddres.BuldingNumber	
Risk.DeliveryAddres.Country	
Risk.DeliveryAddres.CountrySubDivision[0-2]	
Risk.DeliveryAddres.PostCode	
Risk.DeliveryAddres.StreetName	
Risk.DeliveryAddres.TownName	
Risk.MerchantCategoryCode	
Risk.MerchantCustomerIdentification	
Risk.PaymentContextCode	
SCASupportData.AppliedAuthenticationApproach	
SCASupportData.ReferencePaymentOrderId	
SCASupportData.RequestedSCAExemptionType	
SupplementaryData	

14.3 Payment Status

For domestic scheduled payments, a request for a payment status will return one of the following statuses:

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position
	"Initiation Completed"	200	Final	Not available	Not returned via POST
POST /domestic- scheduled-payments	"Initiation Pending"	200	Interim	All brands	The scheduled payment / standing order instruction has been successfully received but not yet set up
	"Initiation Failed"	200	Final	All brands	Instruction has failed
GET /domestic- scheduled- payments/{Domestic ScheduledPaymentId}	"Initiation Pending"	200	Interim	All brands	The scheduled payment / standing order instruction has been successfully received but not yet set up
	"Initiation Completed"	200	Final	All brands	The scheduled payment or standing order has been set up successfully
	"Initiation Failed"	200	Final	All brands	Instruction has failed
	"Cancelled"	200	Final	All brands	The instruction has been cancelled by the customer using their online banking channel (only applies to Scheduled Payments)

15. Domestic Standing Order v3.1.10

15.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

The following payment endpoints are implemented:

Resource	Endpoints	Business Current Account	Foreign Currency Account	Deposit Account	Global Wallet
Domestic-	stic- POST /domestic-standing-order-consents		N	N	N
standing-order-consents GET /domestic-standing-order-consents/{Consented}		Υ	N	N	N
Domostic	POST /domestic-standing-orders		N	N	N
Domestic- standing-orders	GET /domestic-standing- orders/{DomesticStandingOrderId}	Y	N	N	N

15.2 Request Fields (HSBC Corporate)

For POST /domestic-standing-order-consents and POST /domestic-standing-orders:

Field	Notes
Initiation/Frequency (M)	Must be provided as per any of the below supported enumeration values only:
	Daily: EvryWorkgDay
	Weekly: IntrvIWkDay01: <day from="" mon="" of="" starts="" the="" week="" week,=""></day>
	 Every 2 weeks / Fortnightly: IntrvIWkDay02:<day of="" the="" week,="" week<br="">starts from Mon></day>
	 Monthly: IntrvIMnthDay:01:<day month="" of="" the=""></day>
	 Every 2 months: IntrvIMnthDay:02:<day month="" of="" the=""></day>
	 Every 3 months / Quarterly: IntrvIMnthDay:03:<day month="" of="" the=""></day>
	 Every 6 months: IntrvIMnthDay:06:<day month="" of="" the=""></day>
	End of every month: IntrvIMnthDay:01:-01
	 Annually / Yearly: IntrvIMnthDay:12:<day month="" of="" the=""></day>
FirstPaymentAmount (M)	Amount: Must not be more than 19 characters including maximum 3 decimal places. Also, it must not be less than 0.01
	Currency: Must be equal to debit account currency
FinalPaymentAmount (O)	Amount: Must not be more than 19 characters including maximum 3 decimal places. Also, it must not be less than 0.01
	Currency: Must be equal to debit account currency
Initiation/NumberOfPayments (O)	The max range value for numberOfPayments is dependent on the payment type.
	 Priority Payment and Inter-Account Transfer: 2-99
	Standing Order : 2-999
DebtorAccount/SchemeName (O)	May be optionally provided as per any of the below supported enumeration values only :
	UK.OBIE.IBAN
	UK.OBIE.BBAN
	UK.OBIE.SortCodeAccountNumber
DebtorAccount/Identification (O)	May be optionally provided as a valid IBAN, BBAN, SortCodeAccountNumber having character length less than or equal to 35
CreditorAccount/Name (M)	Must be provided
CreditorAccount/SchemeName (M)	Must be provided as per any of the below supported enumeration values only:
	UK.OBIE.IBAN
	UK.OBIE.BBAN
	If you wish to pay BACS Direct Credits (ACH Credits)/Standing Order from a "Great Britain" account, then CreditorAccount/SchemeName must be UK.OBIE.SortCodeAccountNumber
CreditorAccount/Identification (M)	Must be provided in SWIFT character set having character length less than or equal to 34,
	(1) Debtor and Creditor account locations should be the same, and should be amongst the UK and EU countries.
	(2) If the CreditorAccount/SchemeName is mentioned as UK.OBIE.SortCodeAccountNumber, then this CreditorAccount/Identification must be of numeric and of length 14 (comprising first 6 digits as Sort Code, and last 8 digits as Account number).
	(3) If you wish to pay Priority Payment to a "Czech Republic" account, then CreditorAccount/Identification must be a valid Czech Republic IBAN or BBAN.
	(4) If you wish to pay Priority Payment to a "Poland" account, then this CreditorAccount/Identification must be a valid Poland IBAN or BBAN.

Field	Notes
CreditorPostalAddress/AddressLine (O)	(1) May be optionally provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2] for PP payments
	(2) If you wish to pay using "Inter-Account Transfer", then this field must not be filled.
Reference (O)	May be optionally provided
ReadRefundAccount (O)	May be optionally provided (Possible values Yes/No).
	For Standing orders, in HSBCnet only the acceptance of the flag is supported. Actual Refund for standing order has not been supported.
Authorisation.AuthorisationType	Must not be provided
Authorisation.CompletionDateTime	
channelPaymentId	
Creditor.PostalAddress.AddressLine[3 and onwards] (Priority Payment)	
CreditorAccount.SecondaryIdentification	
DebtorAccount.SecondaryIdentification	
Risk.DeliveryAddres.AddressLine[0 -2]	
Risk.DeliveryAddres.BuldingNumber	
Risk.DeliveryAddres.Country	
Risk.DeliveryAddres.CountrySubDivision[0-2]	
Risk.DeliveryAddres.PostCode	
Risk.DeliveryAddres.StreetName	
Risk.DeliveryAddres.TownName	
Risk.MerchantCategoryCode	
Risk.MerchantCustomerIdentification	
Risk.PaymentContextCode	
SCASupportData.AppliedAuthenticationApproach	
SCASupportData.ReferencePaymentOrderId	
SCASupportData.RequestedSCAExemptionType	
SupplementaryData	

15.3 Payment Status Return

For domestic standing order payments, a request for a payment status will return one of the following statuses:

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position
"Initiation Completed" 200 Final Not available		Not returned via POST			
POST /domestic- standing-orders	"Initiation Pending"	200	Interim	HSBCnet	The scheduled payment / standing order instruction has been successfully received but not yet set up
	"Initiation Failed"	200	Final	HSBCnet	Instruction has failed

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position
GET /domestic-standing- orders/{DomesticStandingOrderId}	"Initiation Pending"	200	Interim	HSBCnet	The scheduled payment / standing order instruction has been successfully received but not yet set up HSBCnet will always send 'InitiationPending' for this endpoint.

16. International Payments v3.1.10

16.1 Implemented Endpoints

The following provides an overview for implemented endpoints. International Payments functionality is live.

16.1.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

The following International Payment endpoints are implemented:

Resource	Endpoints	Business Current Account	Foreign Currency Account	Deposit Account	Global Wallet
	POST /international-payment-consents	Y	Y	N	N
International- payment-consents	GET /international-payment-consents/{ConsentId}	Υ	Υ	N	N
payment-consents	GET / international-payment- consents/{ConsentId}/funds-confirmation	Υ	Υ	N	N
I	POST /international-payments	Υ	Υ	N	N
International- payments	GET /international- payments/{InternationalPaymentId}	Y	Y	N	N

16.2 Request Fields

16.2.1 Request Fields for HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

For POST /international-payment-consents and POST /international-payments:

Field	Notes			
Localinstrument (O)	May be optionally provided as per any of the below supported enumeration values in case sensitive format only :			
	 UK.OBIE.SWIFT (for non-UK payments) 			
	 UK.OBIE.Target2 (for all PSD2 payments) 			
	 UK.OBIE.Euro1 (for all PSD2 payments) 			
	 UK.OBIE.SEPACreditTransfer (for SEPA country payments) 			
	 UK.OBIE.SEPAInstantCreditTransfer (for SEPA country instant 			
	payments applicable for certain countries (like "France (FR)",			
	"Netherlands (NL)", "Ireland (IR)")			
	Note: UK.OBIE.BalanceTransfer, UK.OBIE.MoneyTransfer, UK.OBIE.Paym			
	UK.OBIE.Link is not supported currently.			
	UK.OBIE.BACS, UK.OBIE.CHAPS, UK.OBIE.FPS, is not supported via			
	International endpoint payment initiation			

Field	Notes
DebtorAccount/SchemeName (O)	May be optionally provided as per any of the below supported enumeration values only:
	UK.OBIE.IBAN
	UK.OBIE.BBAN
	UK.OBIE.SortCodeAccountNumber
DebtorAccount/Identification (0)	May be optionally provided as a valid IBAN, BBAN, SortCodeAccountNumber having character length less than or equal to 35
ChargeBearer (O)	May be optionally provided as per any of the below supported enumeration values only :
	 BornebyDebtor
	BornebyCreditor
	Shared (4) If Debit Associate Country is any associated country quantity and any and a second life and a second li
	(1) If Debit Account Country is any passported country except UK and "Germany (DE)" countries, and Beneficiary Bank Location is any passported country except UK, then this ChargeBearer may be optionally provided as "Shared" only.
	(2) If Debit Account Country is DE, and Beneficiary Bank Location is "Germany (DE)" or any passported country except UK, then this ChargeBearer may be optionally provided as "BornebyDebtor" or "Shared" only.
	 (3) If Debit Account Country is any passported country except UK and "Germany (DE)", and Beneficiary Bank Location is "Germany (DE)", then this ChargeBearer may be optionally provided as "Shared" only. (4) If you wish to pay using "Eurozone-SEPA - Credit Transfer" OR "Eurozone-SEPA - Credit Transfer Instant", then this ChargeBearer may be optionally
	provided as "Shared" only.
CreditorAccount/Name (M)	Must be provided
Creditor/Name (O)	May be optionally provided as a value same as CreditorAccount/Name only
CreditorAccount/SchemeName (M)	Must be provided as per any of the below supported enumeration values only:
oreditor Accounts scheme value (m)	 UK.OBIE.IBAN UK.OBIE.BBAN
CreditorAccount/Identification (M)	Must be provided in SWIFT character set having character length less than or equal to 34,
	(1) Debtor and Creditor account locations should be the same, and should be amongst the UK and EU countries.
	(2) If the CreditorAccount/SchemeName is mentioned as UK.OBIE.SortCodeAccountNumber, then this CreditorAccount/Identification must be of numeric and of length 14 (comprising first 6 digits as Sort Code, and last 8 digits as Account number)
	(3) If you wish to pay Priority Payment to a "Czech Republic" account, then CreditorAccount/Identification must be a valid Czech Republic IBAN or BBAN
	(4) If you wish to pay Priority Payment to a "Poland" account, then this CreditorAccount/Identification must be a valid Poland IBAN or BBAN
CreditorPostalAddress/AddressLine	(1) May be optionally provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2] for "Priority Payment" payments, and atmost 4 array fields of AddressLine[0-3] for SEPA payments.
	(2) If you wish to pay using "Priority Payment" having Beneficiary bank location as "Canada (CA)" or CurrencyOfTransfer as CAD, then this field must be provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2]
	(3) If you wish to pay using "Inter-Account Transfer" having Credit account country as "Canada (CA)" or CurrencyOfTransfer as CAD, then this field must be provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2]
	Note:- If you wish to pay using "Inter-Account Transfer" having Credit account country as not "Canada (CA)" or CurrencyOfTransfer as not CAD, then this field must not be filled.
CreditorAgent/Identification (O)	May be optionally provided as a valid SWIFT-BIC code (length 8 or 11) or valid Local clearing code specific to the Beneficiary Bank Location (length max 35)
CreditorAgent/Name (O)	Must not be provided

Field	Notes
CurrencyOfTransfer (M)	If you wish to pay using "Eurozone-SEPA - Credit Transfer" OR "Eurozone-SEPA - Credit Transfer Instant", then this CurrencyOfTransfer must be provided as "EUR".
DestinationCountryCode (O)	Only HSBCnet CE supported countries will be allowed. Kindly refer section 19.6.3. If creditorAccount.schemeName is UK.OBIE.IBAN, then this field DestinationCountryCode must match with the first 2 characters of Beneficiary account IBAN. In addition if creditorAccount.schemeName is UK.OBIE.SortCodeAccountNumber, then this field DestinationCountryCode must be GB.
ExchangeRateInformation/ContractIdentification (O)	May be optionally provided as a valid pre-agreed Exchange Contract number with character length less than or equal to 256
ExchangeRateInformation/ExchangeRate (O)	Must not be provided
ExchangeRateInformation/RateType (O)	May be optionally provided as 'Agreed' only
ExchangeRateInformation/UnitCurrency (O)	May be optionally provided as value same Debit Account Currency
ExtendedPurpose (O)	Only HSBCnet CE supported ExtendedPurpose codes will be allowed. Kindly refer section 19.7.3
InstructedAmount (M)	Amount: Must not be more than 19 characters including maximum 3 decimal places. Also, it must not be less than 0.01
	Currency: Must be equal to debit account currency
Purpose (O)	Only HSBCnet CE supported Purpose codes will be allowed. Kindly refer section 19.7.3
RemittanceInformation/Reference (O)	May be optionally provided
RemittanceInformation/Unstructured (O)	May be optionally provided
ReadRefundAccount (O)	May be optionally provided (Possible values Yes/No).
Authorisation.AuthorisationType	Must not be provided
Authorisation.CompletionDateTime	index not be provided
ChannelPaymentId	
Creditor.PostalAddress.AddressLine[3 and onwards] (Priority Payment)

12110	Airport services	16410	Explicitly-charged financial services	21132	Fines and penalties (Government sector)
12120	Port services	16510	Computer services	21242	Fines and penalties
12130	Other terminal facilities				

16.5 FX Rate Validity

16.5.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

The FX rate quoted for international payments on the Open Banking consent journey is valid for 30 seconds from the point when the FX rate is displayed to the customer. From the 30 second window, the customer has 20 seconds to confirm the FX Rate/charges on the HSBCnet CE User Interface.

A 10 seconds buffer is reserved to book the rate in the instance that the rate is accepted in the last seconds of the allowed 20 seconds duration. Upon a PSU accepting the rate, it will be booked and the destination currency will be bought.

TPP is then expected to post the payment instruction within the next 30 seconds. Failure to do so adversely impacts the customer, as the rate has already been booked by HSBCnet CE. Please contact OpenBankingSupport@hsbc.com if the payment instruction fails on the POST.

16.6 Payment Status

For Single Immediate International payments, a request for a payment status HSBC returns one of the following payment statuses:

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position
	"Accepted Credit Settlement Completed"	200	Final	Not available	Not returned via POST
	"Accepted Settlement Completed"	200	Interim	Not available	Not returned via POST
POST /international- payments	"Accepted Settlement In Process"	200	Interim	HSBCnet	All preceding checks such as technical validation and customer profile were successful therefore the payment initiation has been accepted for execution. Debit and credit have not been posted. This will be further updated to: 'Accepted Credit Settlement Completed' or 'Rejected' based on a pay/no-pay decision.
	"Rejected"	200	Final	HSBCnet	Payment request is rejected (no Debit and no Credit posted to the account).

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position
	"Accepted Settlement In Process"	200	Interim	HSBCnet	All preceding checks such as technical validation and customer profile were successful therefore the payment initiation has been accepted for execution. Debit and credit have not been posted. This will be further updated to: 'Accepted Credit Settlement Completed' or 'Rejected' based on a pay/no-pay decision.
GET /international- payments/{PaymentId}	"Accepted Credit Settlement Completed"	200	Final	HSBCnet	Payment request has been processed successfully (i.e., Debit and Credit have been posted successfully). Current balance reflects position after the Debit / Credit has taken place.
	"Rejected"	200	Final	HSBCnet	Payment request is rejected (no Debit and no Credit posted to the account).
	"Pending"	200	Interim	HSBCnet	Payment request is pending for review or authorization.
	"Cancelled"	200	Final	HSBCnet	Payment request is rejected (no Debit and no Credit posted to the account).
	"Awaiting further authorization"	200	Interim	HSBCnet	Payment request is pending for authorization.

17. International Scheduled Payment v3.1.10

17.1 Implemented Endpoints

17.1.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

The following payment endpoints are implemented:

Resource Endpoints		Business Current Account	Foreign Currency Account	Deposit Account	Global Wallet
	POST /international- scheduled-payment-consents	Υ	Υ	N	N
International- scheduled- payment-consents	GET / international- scheduled-payment-consents/{ConsentId}	Υ	Y	N	N
payment concerns	GET /international-payment-consents/{ConsentId}/funds-confirmation	Υ	Υ	N	N
International-	POST / international -scheduled-payments	Υ	Υ	N	N
scheduled- payments	GET /international -scheduled-payments/{ InternationalScheduledPaymentId}	Υ	Υ	N	N

Note: Global Wallet/Working capital debit accounts are NOT supported via International-scheduled-payment-consents endpoint.

17.2 Request Fields

For POST /international-scheduled-payment-consents and POST /international-scheduled-payments:

17.2.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

Field	Notes	
LocalInstrument (O)	May be optionally provided as per any of the below supported enumeration values in case sensitive format only: UK.OBIE.SWIFT (for non-UK payments) UK.OBIE.Target2 (for all PSD2 payments) UK.OBIE.Euro1 (for all PSD2 payments) UK.OBIE.SEPACreditTransfer (for SEPA country payments) UK.OBIE.SEPAInstantCreditTransfer (for SEPA country instant payments applicable for certain countries (like "France (FR)", "Netherlands (NL)", "Ireland (IR)") Note:- UK.OBIE.BalanceTransfer, UK.OBIE.MoneyTransfer, UK.OBIE.Paym, UK.OBIE.Link is not supported currently. UK.OBIE.BACS, UK.OBIE.CHAPS, UK.OBIE.FPS, is not supported via International-scheduled endpoint payment initiation	
RequestedExecutionDateTime (M)	Must be provided in ISO date format and should be within next 45 calendar days	
DebtorAccount/SchemeName (O)	May be optionally provided as per any of the below supported enumeration values only: UK.OBIE.IBAN UK.OBIE.BBAN UK.OBIE.SortCodeAccountNumber	
DebtorAccount/Identification (O)	May be optionally provided as a valid IBAN, BBAN, SortCodeAccountNumbe having character length less than or equal to 35	
ChargeBearer (O)	May be optionally provided as per any of the below supported enumeration values only: BornebyDebtor BornebyCreditor Shared (1) If Debit Account Country is any passported country except UK and "Germany (DE)" countries, and Beneficiary Bank Location is any passported country except UK, then this ChargeBearer may be optionally provided as "Shared" only. (2) If Debit Account Country is DE, and Beneficiary Bank Location is "Germany (DE)" or any passported country except UK, then this ChargeBearer may be optionally provided as "BornebyDebtor" or "Shared" only. (3) If Debit Account Country is any passported country except UK and "Germany (DE)", and Beneficiary Bank Location is "Germany (DE)", then this ChargeBearer may be optionally provided as "Shared" only. (4) If you wish to pay using "Eurozone-SEPA - Credit Transfer" OR "Eurozone-SEPA - Credit Transfer Instant", then this ChargeBearer may be optionally provided as "Shared" only.	
CreditorAccount/Name (M)	Must be provided	
Creditor/Name (O)	May be optionally provided as a value same as CreditorAccount/Name only	
CreditorAccount/SchemeName (M)	Must be provided as per any of the below supported enumeration values only: UK.OBIE.IBAN UK.OBIE.BBAN	

Field	Notes
CreditorAccount/Identification (M)	Must be provided in SWIFT character set having character length less than or equal to 34,
	(1) Debtor and Creditor account locations should be the same, and should be
	amongst the UK and EU countries. (2) If the CreditorAccount/SchemeName is mentioned as UK.OBIE.SortCodeAccountNumber, then this CreditorAccount/Identification must be of numeric and of length 14 (comprising first 6 digits as Sort Code, and last 8 digits as Account number)
	(3) If you wish to pay Priority Payment to a "Czech Republic" account, then CreditorAccount/Identification must be a valid Czech Republic IBAN or BBAN
	(4) If you wish to pay Priority Payment to a "Poland" account, then this CreditorAccount/Identification must be a valid Poland IBAN or BBAN
CreditorPostalAddress/AddressLine	(1) May be optionally provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2] for "Priority Payment" payments, and atmost 4 array fields of AddressLine[0-3] for SEPA payments.
	(2) If you wish to pay using "Priority Payment" having Beneficiary bank location as "Canada (CA)" or CurrencyOfTransfer as CAD, then this field must be provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2]
	(3) If you wish to pay using "Inter-Account Transfer" having Credit account country as "Canada (CA)" or CurrencyOfTransfer as CAD, then this field must be provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2]
	Note:- If you wish to pay using "Inter-Account Transfer" having Credit account country as not "Canada (CA)" or CurrencyOfTransfer as not CAD, then this field must not be filled.
CreditorAgent/Identification (O)	May be optionally provided as a valid SWIFT-BIC code (length 8 or 11) or valid Local clearing code specific to the Beneficiary Bank Location (length max 35)
CreditorAgent/Name (O)	Must not be provided
CurrencyOfTransfer (M)	If you wish to pay using "Eurozone-SEPA - Credit Transfer" OR "Eurozone-SEPA - Credit Transfer Instant", then this CurrencyOfTransfer must be provided as "EUR".
DestinationCountryCode (O)	Only HSBCnet CE supported countries will be allowed. Kindly refer section 19.6.3. If creditorAccount.schemeName is UK.OBIE.IBAN, then this field DestinationCountryCode must match with the first 2 characters of Beneficiary account IBAN. In addition if creditorAccount.schemeName is UK.OBIE.SortCodeAccountNumber, then this field DestinationCountryCode must be GB.
ExchangeRateInformation/ContractIdentification (O)	May be optionally provided as a valid pre-agreed Exchange Contract number with character length less than or equal to 256
ExchangeRateInformation/ExchangeRate (O)	Must not be provided
ExchangeRateInformation/RateType (O)	May be optionally provided as 'Agreed' only
ExchangeRateInformation/UnitCurrency (O)	May be optionally provided as value same Debit Account Currency
ExtendedPurpose (O)	Only HSBCnet CE supported ExtendedPurpose codes will be allowed. Kindly refer section 19.7.3
InstructedAmount (M)	Amount :- Must not be more than 19 characters including maximum 3 decimal places. Also, it must not be less than 0.01
	Currency :- Must be equal to debit account currency
Purpose (O)	Only HSBCnet CE supported Purpose codes will be allowed. Kindly refer section 19.7.3
,	
RemittanceInformation/Reference (O)	May be optionally provided

17.3 Payment status

For international scheduled payments, a request for a payment status will return one of the following statuses:

Must not be provided

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position
	"Initiation Completed"	200	Final	Not available	Not returned via POST
POST /international- scheduled- payments	"Initiation Pending"	200	Interim	HSBCnet	The scheduled payment / standing order instruction has been successfully received but not yet set up
	"Initiation Failed"	200	Final	HSBCnet	Instruction has failed

Endpoint	Status	API Call Status	Status Type	Applicable to	Account Position
GET /international- scheduled- payments/{PaymentId}	"Initiation Pending"	200	Interim	HSBCnet	The scheduled payment / standing order instruction has been successfully received but not yet set up

"Initiation Completed"	200	Final	HSBCnet	The scheduled payment or standing order has been set up successfully
"Initiation Failed"	200	Final	HSBCnet	Instruction has failed
"Cancelled"	200	Final	HSBCnet	The instruction has been cancelled by the customer using their online banking channel (only applies to Scheduled Payments)

18. International Standing Order v3.1.10

18.1 HSBC Corporate Continental Europe (HSBCnet CE Endpoints)

The following payment endpoints are implemented:

Resource	Endpoints	Business Current Account	Foreign Currency Account	Deposit Account	Global Wallet
International-	POST /international-standing-order-consents	Υ	Υ	N	N
standing- order- consents	order- GET /international-standing-order-consents/{ConsentId}		Υ	N	N
International-	POST / international -standing-orders	Υ	Υ	N	N
standing- orders	GET /international-standing-orders/{InternationalStandingOrderPaymentId}	Y	Y	N	N

Note: Global Wallet/Working capital debit accounts are NOT permitted via International-standing-order-consents endpoint

18.2 Request Fields

For POST /international-standing-order-consents and POST /international-standing-orders:

Field	Notes	Error Code if Invalid
Frequency	See separate Permitted Frequency Values section	400 - UK.OBIE.Field.Invalid
NumberOfPayments	Mutually exclusive with presence of FinalPaymentDateTime; one and only one must be present	400 - UK.OBIE.Field.Invalid
	Must be > 0 and ≤ 999	
	If both FinalPaymentDateTime and NumberOfPayments are not present in request then the payment will be considered as to be on- going "Until Further Notice"	
FirstPaymentDateTime	Must be > today+2 and ≤ 365 days ahead Execution date must also be a valid working day	400 - UK.OBIE.Field.Invalid
	Must be < FinalPaymentDateTime, if that field is present	
	Must be < RecurringPaymentDateTime	
	It is the TPP's responsibility to align the FirstPaymentDateTime to the Frequency; for example if it is desired to have the first monthly payment on 20th June, the TPP must set Frequency	

	= IntrvIMnthDay:01:20 (Monthly - 20th) and FirstPaymentDateTime = 2019-06-20	
	Example 1 (correctly aligned):	
	Frequency = IntrvIMnthDay:01:10 (Monthly - 10th)	
	FirstPaymentDateTime = 2019-06-10	
	=> FirstPaymentDateTime = 2019-06-10	
	If they are misaligned, the system will move the FirstPaymentDateTime to be the first date after the input FirstPaymentDateTime that aligns with the Frequency day.	
	Example 2 (misaligned):	
	Frequency = IntrvIMnthDay:01:10 (Monthly - 10th)	
	FirstPaymentDateTime = 2019-06-20	
	=> FirstPaymentDateTime = 2019-07-10	
	Example 3 (misaligned):	
	Frequency = IntrvIMnthDay:01:20 (Monthly - 20th)	
	FirstPaymentDateTime = 2019-06-10	
	=> FirstPaymentDateTime = 2019-06-20	
	Note: the time element has removed from above DateTime examples, for simplicity.	
RecurringPaymentAmount	Optional	400 - UK.OBIE.Field.Invalid
U	If Present ReurringPaymentAmount = FinalPaymentAmount = FirstPaymentAmount	
FinalPaymentAmount	Optional	400 - UK.OBIE.Field.Invalid
·	If Present FinalPaymentAmount = ReurringPaymentAmount = FirstPaymentAmount	
FirstPaymentAmount	Mandatory	400 - UK.OBIE.Field.Invalid
FinalPaymentDateTime	Mutually exclusive with presence of NumberOfPayments; one and only one must be present	400 - UK.OBIE.Field.Invalid
	Must be > tomorrow	
	Must be > FirstPaymentDateTime	
	If both FinalPaymentDateTime and NumberOfPayments are not present in request then the payment will be considered as to be on-going "Until Further Notice"	
RecurringPaymentDateTime	Must be > today+2 and ≤ 365 days ahead	400 - UK.OBIE.Field.Invalid
	Must be > FirstPaymentDateTime	
AuthorisationType	Any or Single	400 - UK.OBIE.Field.Invalid
DebtorAccount/SchemeName	If populated then must be UK.OBIE.SortCodeAccountNumber	400 - UK.OBIE.Field.Invalid
CreditorAccount/SchemeName	Must be UK.OBIE.SortCodeAccountNumber or UK.OBIE.IBAN or UK.HSBC.LocalAccountNumber (Refer section on CreditorAccount object below)	400 - UK.OBIE.Field.Invalid
	For a Me To Me (M2M) transfer from a customer's Personal Current Account (PCA) to the same customer's HSBC Currency Account (HCA) or vice versa the value should be UK.OBIE.SortCodeAccountNumber	

CreditorAccount/Identification	If CreditorAccount/SchemeName = UK.OBIE.SortCodeAccountNumber then identification = SortCodeAccountNumber format (i.e. 14 digits)	400 - UK.OBIE.Field.Invalid
	If CreditorAccount/SchemeName = UK.OBIE.IBAN then identification = IBAN format	
	If CreditorAccount/SchemeName = UK.HSBC.LocalAccountNumber then identification = Local Account Number format of that particular country	
InstructedAmount/Amount	Must be provided	400 - UK.OBIE.Field.Invalid
InstructedAmount/Currency	This can be the debtor account currency Or If instructed amount currency is non equal to debtor account currency then it has to match currency of	400 - UK.OBIE.Field.Invalid
	transfer	
CurrencyOfTransfer	See above rule related to InstructedAmount/Currency	400 - UK.OBIE.Field.Invalid
DestinationCountryCode	This field must not be populated by TPPs. The International payment routing logic is driven by CreditorAgent/PostalAddress/Country	400 - UK.OBIE.Field.Invalid
ChargeBearer	Must be one of BorneByCreditor, BorneByDebtor, Shared	400 - UK.OBIE.Field.Invalid
CreditorAgent/SchemeName	Please refer to Section 19.3 (Intl. Payments)	400 - UK.OBIE.Field.Invalid
CreditorAgent/Identification	Please refer to Section 19.3 (Intl. Payments)	400 - UK.OBIE.Field.Invalid
CreditorAgent/PostalAddress	Please refer to Section 19.4 (Intl. Payments)	400 - UK.OBIE.Field.Invalid
CreditorAccount/Name	Max 35 characters	400 - UK.OBIE.Field.Invalid
ExtendedPurpose	Please refer to Section 19.7.1 (Intl. Payments)	400 - UK.OBIE.Field.Invalid
SupplementaryData.PurposeOfPa yment	Please refer to Section 19.7.2 (Intl. Payments)	400 - UK.OBIE.Field.Invalid

18.3 Request Fields (HSBC Corporate Continental Europe (HSBCnet CE Endpoints))

Field Notes			
Initiation/Frequency (M)	Must be provided as per any of the below supported enumeration values only:		
	 Daily: EvryWorkgDay 		
	 Weekly: IntrvIWkDay01:<day from="" mon="" of="" starts="" the="" week="" week,=""></day> 		
	 Every 2 weeks / Fortnightly: IntrvIWkDay02:<day of="" the="" week,="" week<br="">starts from Mon></day> 		
	 Monthly: IntrvIMnthDay:01:<day month="" of="" the=""></day> 		
	 Every 2 months: IntrvIMnthDay:02:<day month="" of="" the=""></day> 		
	 Every 3 months / Quarterly: IntrvIMnthDay:03:<day month="" of="" the=""></day> 		
	 Every 6 months: IntrvIMnthDay:06:<day month="" of="" the=""></day> 		
	 End of every month: IntrvIMnthDay:01:-01 		
	 Annually / Yearly: IntrvIMnthDay:12:<day month="" of="" the=""></day> 		

Field	Notes
Initiation/NumberOfPayments (O)	If you wish to pay using "Priority Payment" or "Inter-Account Transfer", then may be optionally provided in whole number format between 2 and 99.
DebtorAccount/SchemeName (O)	May be optionally provided as per any of the below supported enumeration values only: UK.OBIE.IBAN UK.OBIE.BBAN UK.OBIE.SortCodeAccountNumber
DebtorAccount/Identification (O)	May be optionally provided as a valid IBAN, BBAN, SortCodeAccountNumber having character length less than or equal to 35
ChargeBearer (O)	May be optionally provided as per any of the below supported enumeration values only: BornebyDebtor BornebyCreditor
	 Shared (1) If Debit Account Country is any passported country except UK and "Germany (DE)" countries, and Beneficiary Bank Location is any passported country except UK, then this ChargeBearer may be optionally provided as "Shared" only. (2) If Debit Account Country is DE, and Beneficiary Bank Location is "Germany (DE)" or any passported country except UK, then this ChargeBearer may be optionally provided as "BornebyDebtor" or "Shared" only. (3) If Debit Account Country is any passported country except UK and "Germany (DE)", and Beneficiary Bank Location is "Germany (DE)", then this ChargeBearer may be optionally provided as "Shared" only.
CreditorAccount/Name (M)	Must be provided
Creditor/Name (O)	May be optionally provided as a value same as CreditorAccount/Name only
CreditorAccount/SchemeName (M)	Must be provided as per any of the below supported enumeration values only : UK.OBIE.IBAN UK.OBIE.BBAN
CreditorAccount/Identification (M)	Must be provided in SWIFT character set having character length less than or equal to 34, (1) Debtor and Creditor account locations should be the same, and should be amongst the UK and EU countries. (2) If the CreditorAccount/SchemeName is mentioned as UK.OBIE.SortCodeAccountNumber, then this CreditorAccount/Identification must be of numeric and of length 14 (comprising first 6 digits as Sort Code, and last 8 digits as Account number)
	 (3) If you wish to pay Priority Payment to a "Czech Republic" account, then CreditorAccount/Identification must be a valid Czech Republic IBAN or BBAN (4) If you wish to pay Priority Payment to a "Poland" account, then this CreditorAccount/Identification must be a valid Poland IBAN or BBAN
CreditorPostalAddress/AddressLine	(1) May be optionally provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2] for "Priority Payment" payments.
	(2) If you wish to pay using "Priority Payment" having Beneficiary bank location as "Canada (CA)" or CurrencyOfTransfer as CAD, then this field must be provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2]
	(3) If you wish to pay using "Inter-Account Transfer" having Credit account country as "Canada (CA)" or CurrencyOfTransfer as CAD, then this field must be provided in SWIFT character set having character length less than or equal to 35 in atmost 3 array fields of AddressLine [0-2]
	Note:- If you wish to pay using "Inter-Account Transfer" having Credit account country as not "Canada (CA)" or CurrencyOfTransfer as not CAD, then this field must not be filled.
CreditorAgent/Identification (O)	May be optionally provided as a valid SWIFT-BIC code (length 8 or 11) or valid Local clearing code specific to the Beneficiary Bank Location (length max 35)
CreditorAgent/Name (O)	Must not be provided

Field	Notes
DestinationCountryCode (O)	Only HSBCnet CE supported countries will be allowed. Kindly refer section 19.6.3. If creditorAccount.schemeName is UK.OBIE.IBAN, then this field DestinationCountryCode must match with the first 2 characters of Beneficiary account IBAN. In addition if creditorAccount.schemeName is UK.OBIE.SortCodeAccountNumber, then this field DestinationCountryCode must be GB.
ExchangeRateInformation/ContractIdentification (O)	May be optionally provided as a valid pre-agreed Exchange Contract number with character length less than or equal to 256
ExchangeRateInformation/ExchangeRate (O)	Must not be provided
ExchangeRateInformation/RateType (O)	May be optionally provided as 'Agreed' only
ExchangeRateInformation/UnitCurrency (O)	May be optionally provided as value same Debit Account Currency
ExtendedPurpose (O)	Only HSBCnet CE supported ExtendedPurpose codes will be allowed. Kindly refer section 19.7.3
InstructedAmount (M)	Amount: Must not be more than 19 characters including maximum 3 decimal places. Also, it must not be less than 0.01
	Currency: Must be equal to debit account currency
Purpose (O)	Only HSBCnet CE supported Purpose codes will be allowed. Kindly refer section 19.7.3
Reference (O)	May be optionally provided
ReadRefundAccount (O)	May be optionally provided (Possible values Yes/No). For Standing orders, only the acceptance of the flag is supported. Actual Refund for standing order has not been supported.
Authorisation.AuthorisationType	Must not be provided
Authorisation.CompletionDateTime	
ChannelPaymentId	
Creditor.PostalAddress.AddressLine[3 and onwards] (Priority Payment)	
CreditorAccount.SecondaryIdentification	
CreditorAgent.Name	
CreditorAgent.PostalAddress entire Object (any field inside)	
DebtorAccount.SecondaryIdentification	
ExchangeRateInformation.exchangeRate	
Purpose	
Risk.DeliveryAddressAddressLine[0 -2]	
Risk.DeliveryAddres.BuldingNumber	
Risk.DeliveryAddres.Country	
Risk.DeliveryAddres.CountrySubDivision[0-2]	
Risk.DeliveryAddres.PostCode	
Risk.DeliveryAddres.StreetName	
Risk.DeliveryAddres.TownName Risk.MerchantCategoryCode	
Risk.MerchantCustomerIdentification	
Risk.PaymentContextCode	
SCASupportData.AppliedAuthenticationApproach	
SCASupportData.ReferencePaymentOrderId	
SCASupportData.RequestedSCAExemptionType	

18.4 Permitted Frequency Values

The permitted frequencies that are allowed by the online channels are as follows:

- Weekly
- Monthly
- 4 weekly
- Quarterly
- Annually
- Last working day of the month

The corresponding frequency patterns as per the OBIE schema are as below:

Field - Frequency	Description	
IntrvlWkDay:01:XX	Same day every week (Weekly) where XX is 01-05 representing Monday to Friday	
IntrvlMnthDay:01:XX	Same day on every month (Monthly) where XX is 01-31 representing date of the month	
IntrvIWkDay:04:XX	Same day on every 4 weeks where XX is 01-05 representing Monday to Friday	
IntrvlMnthDay:03:XX	Same day every 3 months where XX is 01-31 representing date of the month	
IntrvlMnthDay:12:XX	Same day every year where XX is 01-31 representing date of the month	
IntrvlMnthDay:01:31		
IntrvIMnthDay:01:30	March to and Adhers to March Ford	
IntrvIMnthDay:01:29	Monthly and Adhere to Month End	
IntrvIMnthDay:01:28		

18.5 Payment Status

For international standing order payments, a request for a payment status will return one of the following statuses:

InitiationPending

HSBCnet will always send back 'InitiationPending' for all scenarios.

19. File Payments

19.1 Implemented Endpoints

The following File Payments endpoints are implemented for HSBCnet UK:

Resource	Endpoints	Implemented
file-payments-consent	POST /file-payment-consents	Υ
	POST /file-payment-consents/{ConsentId}/file	Υ
	GET /file-payment-consents/{ConsentId}	Υ

Resource	Endpoints	Implemented
file-payments	POST /file-payments	Υ
	GET /file-payments/{FilePaymentId}	Y
	GET /file-payments/{FilePaymentId}/payment-details	N
	GET /file-payments/{FilePaymentId}/report-file	N

19.2 Request Fields and Example File

HSBCnet will accept payments via the file-payment endpoint for subsequent processing via appropriate payments processing system. Instructions can only be submitted in XMLV3 format, and the file size must be <6MB.

For POST /file-payment-consents:

Field	Notes	
FileType	FileType should be equal to UK.OBIE.pain.001.001.08	
FileHash	A base64 encoding of a SHA256 hash of the file to be uploaded	
authorisationType	Mandatory field assuming one of the following values - • A-Pre Authorised • V-File Level With Summary • F-File Level With Details	
SupplementaryData/ConnectProfileId	String value containing the Profile Identification Code (PIC)	
SupplementaryData/AuthorisationLevel	String value that describes the Authorisation Level details for the payment	
SupplementaryData/FileName	Mandatory String value describing the File Name. Must have prefix "PSD2_" followed by the File Name. Max length should be 255 characters.	

For POST /file-payment-consents/{ConsentId}/file and POST/file-payments: For the best experience using the File Payment endpoint we advise you keep the information in your metadata and the File consistent – this will ensure the best chances of a successful journey.

Example XML – We advise that you use the below file as a guide for your payments

```
<?xml version="1.0" encoding="utf-8"?>

19.3 Payment Status

Endpoint	Status	Status Type	Notes
POST /file-payments	InitiationPending	Interim	The file payment instruction has been successfully received but not yet set-up.
	InitiationPending	Interim	The file payment instruction has been successfully received but not yet set-up.
GET /file- payments/{FilePaymentId}	InitiationCompleted	Final	The file payment has been set up successfully
payments/(i ner aymentia)	InitiationFailed	Final	The file payment has been rejected by downstream while processing.

20. Multi-Authorisation

20.1 HSBC Corporate Continental Europe (HSBCnet CE) Implemented Endpoints

Resource	Endpoints	Implemented
Domestic-payment-	POST /domestic-payment-consents	Υ
consents	GET /domestic-payment-consents/{ConsentId}	Υ
Damastia naumanta	POST /domestic-payments	Υ
Domestic-payments	GET /domestic-payments/{DomesticPaymentId}	Υ
Damas da a abadada d	POST /domestic-scheduled-payment-consents	Υ
Domestic-scheduled- payment-consents	GET /domestic-scheduled-payment-consents/{ConsentId}	Υ
Demostic cabadulad	POST /domestic-scheduled-payments	Υ
Domestic-scheduled- payments	GET /domestic-scheduled-payments/{DomesticScheduledPaymentId}	Υ
International necessary	POST /international-payment-consents	Υ
nternational-payment- consents	GET /international-payment-consents/{ConsentId}	Υ

	POST /international-payments	Υ
International-payments	GET /international-payments/{InternationalPaymentId}	Υ
International-scheduled- payment-consents	POST /international- scheduled-payment-consents	Y
	GET / international- scheduled-payment-consents/{ConsentId}	Υ
International-scheduled-	POST / international -scheduled-payments	Υ
payments	GET /international -scheduled-payments/{ InternationalScheduledPaymentId}	Υ

- multiAuthorisation/numberRequired & multiAuthorisation/numberReceived fields will not be formatted in the response, since these are not available at HSBCnet CE.
- Multi Authorisation response for POST /international-standing-orders & GET /international-standing-orders/{InternationalStandingOrderPaymentId} will not be formatted in the response.
- In case of payment status as "Rejected" & "InitiationCompleted", there will be no Multi Authorisation response to be formatted.

20.2 TPP Authorisation Type

It is essential that any TPP initiating payments through Business Banking indicates their requirement in the AuthorisationType field. In line with the OBIE spec, this field can contain "Single" or "Any". If this is not received, it will be assumed that multi-authorisation is supported (AuthorisationType = Any). Failure to indicate Authorisation Type may result in failed payments if the TPP does not support multi-authorisation.

20.3 Multi-Authorisation Object Status

For payments that require further authorisation, a request for a multi-authorisation status will return one of the following statuses:

- AwaitingFurtherAuthorisation: when a user has initiated a payment above their payment limit and that payment has yet to be authorized by a user with a sufficient limit in HSBC's direct channel.
- Rejected: when a user has initiated a payment above their payment limit and that payment has been rejected by a user with a sufficient limit in HSBC's direct channel.

For the avoidance of doubts this refers to the MultiAuthorisation object in the payment-order consent, and not to Payment Status Object.

Confirmation of Funds Summary v3.1.10

21. Confirmation of Funds Summary v3.1.10

21.1 Implemented Endpoints

The following endpoints are implemented.

21.1.1 HSBC Corporate Continental Europe (HSBCnet CE) Endpoints

Resource	Endpoints	Business Current Account	Credit cards
	POST/funds-confirmation-consents	Υ	Υ
Candium ation of tunds	DELETE/funds-confirmation-consents/{ConsentID}	Y	Y
Confirmation-of-funds	GET/funds-confirmation-consents/{ConsentID}	Υ	Υ
	POST/funds-confirmations	Υ	Y

21.2 Request Fields

For POST /funds-confirmations

Field	Notes	Error code if Invalid
InstructedAmount / Currency	Currency in the request should match the Account Currency of the PSU, for which the PSU has given consent.	400 - UK.OBIE.Field.Invalid

22. HSBC Error Codes

22.1 Common Errors

Common Errors					
Error Code	HTTPS Status	Situations in which used	Error Message		
"UK.OBIE.Header. Invalid"	400 Bad Request	TPP requests this operation (other than the one that created intent)	N/A		
"UK.OBIE.Header. Invalid"	400 Bad Request	x-fapi-financial-id exists but contains an illegal value	"Message": "Invalid header"		
"UK.OBIE.Header. Invalid"	400 Bad Request	x-fapi-customer-last- logged-time value is illegal	"Message": "Invalid header"		

"UK.OBIE.Header. Invalid"	400 Bad Request	x-fapi-customer-ip-address value is illegal	"Message": "Invalid header"
"UK.OBIE.Header. Invalid"	400 Bad Request	x-fapi-interaction-ids value is illegal	"Message": "Invalid header"
"UK.OBIE.Header. Invalid"	400 Bad Request	Message signing using JWS Signature	"Message": "Request failed unexpectedly"
"UK.OBIE.Header. Invalid"	400 Bad Request	x-hsbc-forwarded-for has an invalid value	{"Id":"25775b7f-32be-4591-a11a-ba333f99e3d1","Code ":"500","Message":"Int ernal Server Error","Errors":[{"Error Code":"UK.OBIE.Une xpectedError","Messa ge":"Request failed unexpectedly"}]}
"UK.OBIE.Header. Invalid"	400 Bad Request	x-idempotency-key	N/A
"UK.OBIE.Header. Missing"	400 Bad Request	x-fapi-financial-id header is missing	"Message": "Missing header"
N/A	401 Unauthorized	Authorization header is either empty or not present	N/A
N/A	401 Unauthorized	Authorization header is present but in an unexpected format	N/A
N/A	401 Unauthorized	TPP profile is not found in the OBIE Directory	N/A
N/A	401 Unauthorized	TPP does not have any "active authorizations"	N/A
N/A	401 Unauthorized	Token has expired (time to live has been exceeded)	N/A
N/A	401 Unauthorized	Intent token is not found (for given authorization header and grant type). Possible reason is that it was not created	N/A

N/A	401 Unauthorized	Intent does not exist (for given authorization and grant type)	N/A
N/A	401 Unauthorized	TPP software record has not been found in a TPP store (unrecognizable TPP)	N/A
N/A	403 Forbidden	Data requested falls outside of Article 10a parameters; reauthentication required	N/A
N/A	403 Forbidden	Access token revoked; reauthentication required	N/A
N/A	403 Forbidden	Software Statement for given TPP either does not exist or is not active	N/A
N/A	403 Forbidden	Software Statement for given TPP does not have required role (to perform this particular operation)	N/A
N/A	403 Forbidden	Given scope (openid, accounts, payments, fundsconfirmation) is not allowed by Software Statement (collection of roles is passed to check that)	N/A
N/A	403 Forbidden	Intent token has been created for some other brand (other than requested)	N/A
N/A	403 Forbidden	Intent scope list does not contain any of the requested scopes	N/A
N/A	403 Forbidden	Other TPP is requesting this operation (other than the one that created intent)	N/A
N/A	403 Forbidden	Line of business from TPP Software Statement differs from the requested line of business	N/A
N/A	502 Bad Gateway	Cannot connect to the OBIE Directory (and verify TPP)	N/A

		T	
N/A	502 Bad Gateway	Cannot obtain from intent from intent store for unexpected reason (e.g. connectivity)	N/A
N/A	502 Bad Gateway	Cannot connect to TPP store	N/A
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	Client DN Header is present but in an unexpected format	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	Grant type value is not recognized (this is an internal error)	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	This is a technical error. Operation (fetching from an external system) took too much time (timeout) or was interrupted by some other thread. In normal situation this should not happen	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	TPP profile does not have information whether or not particular 'authorization` is active or not	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	Intent token has been created for some other grant type (other than requested)	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	Grant type is not expected (other than authorisation code, refresh token or client credential grant)	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	Intent's grant type is unrecognizable or is not one of the expected values	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	Conversion of object into json is not successful (technical error)	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	Unexpected TPP role	"Message": "Request failed unexpectedly"
"UK.OBIE.Unexpe ctedError"	500 Internal Server Error	Unexpected grant type	"Message": "Request failed unexpectedly"

22.2 Authorisation and Token Errors

22.2.1 Authorisation Endpoint

	Authorisation Errors					
Error Code	HTTPS Status	Situations in which used	Error Message			
"UK.HSBC.FailedEli gibilityCheck "	401 Unauthorized	User does not have a profile in internet banking	N/A			
"UK.HSBC.FailedEli gibilityCheck "	401 Unauthorized	User does not have a service ID in internet banking	N/A			
"UK.HSBC.FailedEli gibilityCheck "	401 Unauthorized	User security level is less than 40	N/A			
"UK.HSBC.FailedEli gibilityCheck "	401 Unauthorized	Secure key for username is locked	N/A			
"UK.HSBC.FailedEli gibilityCheck "	401 Unauthorized	Secure key for username is unregistered	N/A			
"UK.HSBC.FailedEli gibilityCheck "	401 Unauthorized	User account is locked in internet banking	N/A			
"UK.HSBC.FailedEli gibilityCheck "	401 Unauthorized	User account is suspended in internet banking	N/A			
"UK.HSBC.FailedEli gibilityCheck "	401 Unauthorized	User account is locked (temporary)	N/A			
"UK.OBIE.Field.Inva	400 Bad Request	TPP with given ID is not found in TPP Database (for given client ID)	Error description": "Missing TTP Register"			
"UK.OBIE.Field.Inva lid"	400 Bad Request	Redirect URL is invalid (or does not match redirect from TPP)	Error_description": "Invalid Redirect Url provided in request: https://bad.url.com/"}			
Null	302 or 403 (for mobile)	Request is missing JWT or Invalid JWT or Invalid Scope	N/A			

22.2.2 Token Endpoint

		Token Errors	
Error Code	HTTPS Status	Situations in which used	Error Message
"UK.OBIE.Field.Inva lid"	400 Bad Request	Request has a non- compliant JSON body	N/A
"UK.OBIE.Field.Inva lid"	400 Bad Request	Request has an invalid grant	N/A
"UK.OBIE.Field.Inva lid"	400 Bad Request	Consent access record cannot be found in a database	{"error":"invalid_request","er ror_description":"Could not find Consent Access Record in database with provided Authorization Code"}
"UK.OBIE.Field.Inva lid"	400 Bad Request	Consent does not exist for a given ID	{"error":"invalid_request","er ror_description":"Could not find Consent Record in database with provided ID"}
"UK.OBIE.Field.Inva lid"	400 Bad Request	Illegal grant type from request	{"error":"invalid_grant","erro r_description":"Invalid Grant Type: Not supported Grant Type. Should be authorization_code, client_credentials, refresh_token"}
"UK.OBIE.Unexpect edError"	500 Internal Server Error	Unsuccessful call to Forgerock	{"error":"server_error","error _description":"Problem with connection to the Token Endpoint"}
"UK.OBIE.Unexpect edError"	500 Internal Server Error	Error calling downstream system (any reason)	{"error":"server_error","error _description":"Error while making call to DSP service"}
"UK.OBIE.Unexpect edError"	500 Internal Server Error	Authorization date is not present in consent access	{"error":"server_error","error _description":"Missing Consent Access Authorized Date"}
"UK.OBIE.Unexpect edError"	500 Internal Server Error	Error during de-serialization of canonical consent	{"error":"server_error","error _description":"Canonical Consent Deserialization Error"}

"UK.OBIE.Unexpect	500 Internal	Error calling fraud service	{"error":"server_error","error
edError"	Server Error		_description":""}

22.3 Account Information Service (AIS)

22.3.1 Consents
